

Automated MM860 Robotic Mount

Motorized Drop Down & Swivel TV Mount

The award-winning MantelMount presents a Smart Home Ready™ motorized TV mount that automatically lowers and swivels a TV to eye level for a comfortable home theater viewing experience. It's the ideal solution for upscale installations high on a wall or over a fireplace. The MM860 Mount is a superior home automation solution that works with all popular automation control systems.

Distinguishing features include:

- 2 AUTOMOTIVE GAS PISTONS** for the smoothest travel and enhanced stabilization

Keeps its last location in memory, eliminating the need for a reset after power interruption
- SIMULTANEOUS DROP AND SWIVEL** Patented Multi-Axis hub, proprietary software and precision electronic actuators lower and swivel the TV in one quick fluid motion

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- REMOTE CONTROL CHOICES** Controlled through the included 433 MHZ RF remote, IRDA for Logitech and URC remotes, and popular home automation systems

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- HOME AUTOMATION OPTIONS** Works over IP with Control4, URC, RTI, Crestron, Savant, Elan and Logitech

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- POWER SENSING TECHNOLOGY** Detects when the TV is turned on and automatically lowers it to a favorite preset. Provides automation even without a control system.

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- SILENT OPERATION** Two custom electronic actuators allow for smooth, barely audible movement

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- RECESSIBLE HOUSING** Conceals the lifting arm and electronics in the raised position. Can be recessed for flush-to-wall installations.

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- TEMPERATURE-SENSING MONITOR** TV automatically retracts to its home position when an unsafe temperature is detected

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- MULTIPLE MEMORY PRESETS** Easily program multiple preset positions for favorite viewing locations

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- POWER LOSS RECOVERY**

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- SOFT & HARD TRAVEL STOPS**

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- PLUG & PLAY NETWORKING** DHCP enabled right out of the box. Easily identifiable on the network.

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- ON-BOARD WEB SERVER** For simple browser-based configuration

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- ONLINE SOFTWARE UPDATES** Download the latest software and firmware updates from the internet directly to the control module

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- COMMUNICATION PROTOCOLS** Can be managed with IP via Ethernet or IR through an IRDA port

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- POST-INSTALLATION LEVELING** Allows for screen position refinement after the mount is installed

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- HORIZONTAL BRACES WITH PAINTABLE COVERS** Make retrofitted installations fast and easy, for both recessed or surface installations

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel
- EASY TO SERVICE** The mount installs in one piece. Electronics are contained in a single lightweight module that's easily shipped, removed and replaced.

Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel

RF Remote Included.

MantelMount. MM860

U.S. PATENT NO. 10,738,941

Paintable, powder-coated matte finish

Dual heavy-duty tubular steel lifting arms attached to lift housing

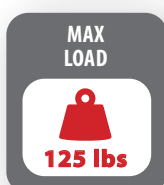

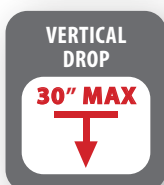

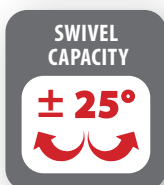

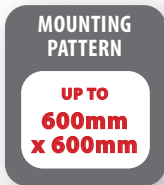

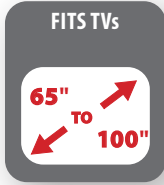

Multi-Axis Hub

Cable Ties keep mounting environment organized

Adapters accommodate up to a 40" sound bar

Specifications

Optimal TV Size	65" – 100"
Weight Capacity	125 lbs.
Mount Weight	90 lbs.
Package Weight	95 lbs.
Package Dim.	39" x 21.5" x 9.5"
UPC Code	860001148909
UMAP / MSRP	\$2,199 / \$2,199

Lifetime Limited Warranty. See FAQs at mantelmount.com for details.

All necessary hardware included.

Expert Customer Support at 1.800.897.9755 x1
