

CHOLESTA CHECK

Part of ESP Program*

Functional

Functionals focus on specific conditions and work to reduce, improve, restore, and assist the body to take or make corrective actions adding elements that can restore balance to the body.

ADVANCED CHOLESTEROL MANAGEMENT FORMULATION THAT ENHANCES LIVER FUNCTION & BLOOD FAT METABOLISM

THE ENEREX ADVANTAGE

- > Features new ingredient Red Yeast Rice (rice fermented with healthful yeast)
- > Red Yeast Rice clinically shown to lower total cholesterol & LDL cholesterol
- > Revered Reishi Mushroom decreases cholesterol in addition to numerous health benefits
- > Policosanol, made from purified sugarcane wax, clinically shown to manage cholesterol
- > L-Methionine has been studied since 1963 for its liver fat-reducing properties
- > Formula helps lower heart disease/stroke risks without drugs' side effects

EACH VEGETARIAN CAPSULE CONTAINS:

Medicinal Ingredients:

Plant Sterols (<i>Glycine max</i> seed, Beta-sitosterol, Campesterol, Stigmasterol 80%) . . .	250 mg
Red Yeast Rice (<i>Monascus purpurea</i> -fermented <i>Oryza sativa</i>) Whole	50 mg
Niacin (B3) Nicotinic Acid	50 mg
L-Methionine	30 mg
Choline (Bitartrate)	30 mg
Inositol	20 mg
Pyridoxine Hydrochloride (B6)	15 mg
Ganoderma Lucidum (Reishi 50:1*) Fruiting Body	5 mg
Policosanol (<i>Saccharum officinarum</i>) Wax	2.5 mg
Folate (B9) Folic Acid	150 mcg
Cyanocobalamin (B12)	150 mcg

*Dried Herb Equivalent: 250 mg

There are no other ingredients added to this formula.

ADULTS: Take 1 capsule 3 times daily with food or 3 capsules once daily with food, or as directed by a health care practitioner.

CHOLESTA CHECK

Cholesta Check's nutritional support works with the body's natural processes to promote healthy artery blood flow. Studies show that nutrition & lifestyle changes are as, or even more effective than cholesterol-lowering drugs even if they take a little longer.

BENEFITS

- > Reishi Mushroom decreases cholesterol by affecting liver's cholesterol production
- > Red Yeast Rice lowers LDL cholesterol due to its monacolins
- > Plant Sterols block cholesterol absorption/offset amount of cholesterol in intestines
- > Policosanol may decrease total cholesterol and increase HDL cholesterol
- > Vitamins B3, B6, B2, B12 play essential roles in lipid metabolism & fatty acid production
- > Niacin has cholesterol-lowering effect, enlarges blood vessels & reduces the amount of fat broken down & released into blood stream
- > Vitamins B6, Folic Acid & B12 maintain proper homocysteine levels, a risk factor for heart disease/stroke
- > Vitamin B6 helps to manufacture Niacin, lowers blood pressure & keeps blood platelets from sticking
- > Deficiency of Folic Acid related to poor heart health due to improper homocysteine regulation
- > Choline and Inositol help metabolize (process) cholesterol in the liver
- > Inositol "liquefies fats" in the blood & prevents them from clogging arteries
- > Vitamin B12 helps to metabolize fats; studies show low B12 creates improper fat production in liver
- > L-Methionine, an amino acid, helps reduce liver's fat & influences cholesterol levels
