Enerex Digest Best improves the digestion and assimilation of food by helping to break down every kind of food group: carbohydrates, proteins, fats, dairy, plant and vegetable material (cellulose). This combination of enzymes are of particular benefit to those with gluten and casein issues. Our addition of Betaine HCl helps with indigestion, while L-Glutamine serves to repair and soothe the digestive tract.

Digest Best is designed to replace the enzymes lost in the cooking and processing of food. For those who want to fully benefit from the nutrients in the foods they consume, we heartily recommend Digest Best.
