PART OF THE  
ESP PROGRAM\*

## HUMAN STRAIN PROBIOTICS FOR SEAMLESS ASSIMILATION CONTRIBUTING TO A HEALTHY INTESTINAL FLORA

### The Enerex Advantage

- > Room temperature stable
- > 2 - 5 billion live strains
- > Japanese technology & raw material
- > Manufactured in Canada
- > Enhances growth of friendly bacteria, while inhibiting growth of pathogenic bacteria
- > Alleviates flatulence, and may reduce diarrhea and constipation
- > Helps reduce cholesterol and production of toxic/carcinogenic compounds in the intestinal tract
- > Increases immunity and bacterial resistance
- > May combat yeast infections
- > Produces vitamins and other nutritional factors
- > No refrigeration required/stable at room temperature: perfect travel companion
- > FOS is proven to increase friendly bacteria from 5 to 10 times

Each capsule of **The Friendly Trio®** contains 2 billion **live** cultures of the optimum friendly bacteria for balanced intestinal flora. The Friendly Trio® are derived from living microorganisms found in the human body, and perfected through decades of laboratory culturing. Used in over 30,000 hospitals and clinics worldwide, these specially cultured human strains are carefully processed to retain viability at room temperature.

Lactic acid bacteria are essential for human beings. These microorganisms, which have the specific property of transforming sugars into lactic acid and acetic acid, decrease the pH of the intestines and produce substances that suppress harmful bacteria. These functions are so important that we designate lactic bacteria as 'Probiotic' - agents that protect life.
