

HEAVY METAL DETOX

PART OF THE
ESP PROGRAM*

EFFECTIVE DAILY DEFENSE AGAINST HEAVY METALS AND ENVIRONMENTAL TOXINS

The Enerex Advantage

- > Defends against the toxins that are increasingly a part of everyday life
- > Heavy metals such as lead and mercury are associated with many health issues
- > Heavy Metal Detox safely facilitates the release of heavy metals and environmental toxins from the body
- > Contains powerful Humic and Fulvic acids combined with cleansing minerals and raw kale for optimal detoxification
- > Also a comprehensive essential and trace mineral supplement
- > Ideal for those with exposure to vehicle exhaust, smoking, industrial pollutants (construction, mining, forestry, oil & gas),

80042562

Humic and Fulvic acids enter into all life processes within plants and animals. They act as free-radical scavengers, supply vital electrolytes, enhance and transport nutrients, catalyze enzyme reactions, increase assimilation, stimulate metabolism, bond to essential major and trace elements making them more beneficial, and demonstrate amazing capacity for electrochemical balance.

Enerex Heavy Metal Detox, known as “The Daily Defender”, is a complex organic mineral carrier/detoxifier that not only facilitates superior absorption of essential macro and trace minerals, but due to its ion exchange properties, binds to and removes heavy metals such as lead, cadmium, and mercury. The Humic and Fulvic acids in this formula are sourced from ancient organic peat deposits to provide a completely safe and effective daily means of detoxification.
