It is common for men to experience diminished sex drive after age 40. Libido is fueled by the hormone testosterone, and free testosterone levels naturally decrease by about 10 percent each decade from age 30 onward. **Enerex Satisfaction** is the perfect supplement for any man who wants to boost his libido and improve his sexual performance.

Enerex Satisfaction for men is a combination of nutrients and herbal aphrodisiacs to help increase libido and sexual performance by increasing circulation, arousal and “staying power”- all key ingredients to a healthy, satisfying sex life. Enerex designed Satisfaction as a safe, all-natural alternative to pharmaceutical sexual enhancement products.
