

## Chloramines, Chlorine, VOC's, Lead, Fluoride, and Heavy Metals

**NSF Certified** – Standard 42—Component

### **Contaminant Removals**

**Chloramines**— >99% ANSI/NSF Standard 42

**Chlorine**— >99% ANSI/NSF Standard 42

**Lead**— >99% ANSI/NSF Standard 53

**Fluoride**— >93% All types—Fluorosilicic acid/hydrofluorosilicate, sodium fluorosilicate, and sodium fluoride

**Heavy Metals**— >98% ANSI/NSF Standard 53

**VOC's**— >94% ANSI/NSF Standard 53

**Pharmaceutical Compounds**— >96% ANSI/NSF Standard 401

**PFAS**—>95% ANSI/NSF Standard 53 (Updated test—7 compounds)

### **Capacities**

Chloramines—3500 Gallons

Lead—3500 Gallons

Fluoride—1000 Gallons

PFAS— 435 Gallons

### **Size**

2.5" x 9.75" OBE Cartridge

AquaMetix® is a proprietary matrix comprising of at least two types of activated carbon, combined with proprietary Zeolite minerals, structurally bound with polymers into a highly porous block filter form.

AquaMetix® combines the highest FDA-compliant raw materials, with cutting-edge manufacturing methods resulting in unparalleled performance in an exclusively U.S.A. Manufactured product.

These filters are not intended to be used where the water is microbiologically unsafe or with water of unknown quality without adequate disinfection before or after the filter.

Maximum operating temperature 100°F; Maximum operating pressure 100 psi.

All performance claims presented here are based on data from independent third party testing, believed to be reliable but are not to be considered a warranty of performance.

Performance of the filter may be altered by the housing, or the source water's organic content, turbidity, pH, or other conditions encountered in actual use.

**COMPONENT**

This AquaMetix cartridge is Tested and Certified by NSF International Against NSF/ANSI Standard 42 for material requirements only.

This filter was manufactured and produced in the United States of America by:  
Ceramic Filters Company, Inc.  
Produced in Brooklyn, Michigan USA
