HISTORY

Established in 1956, Ferhat Berbercan Furniture has prioritized quality since its establishment and has shaped its entire production line accordingly. Thanks to its original designs inspired by nature, it continues to grow as a company that directs the furniture industry in Türkiye. Having many dealers and business partners in Turkey and around the world, FF always has a business approach based on growing its business partners. Being aware of the fact that togetherness is stronger, FF always looks out for the interests of its business partners. In this way, the number of business partners is increasing day by day and the trust in FF company is renewed day by day.

How do we produce?

We collect carefully selected Beech trees from Turkey's most homogeneous tree flora and pass them through many stages to make them ready for processing. We use first class skeleton materials as we know that quality starts from the ground up. We obtain all of the MDF, Paint and Metal parts from long-lasting materials whose quality has been approved by the relevant institutions. Every material we use has a certificate, we are renewing our production line day by day and we are trying to adapt to the age of technology. We are ready to respond to many needs with a production capacity of approximately 45,000m². In this way, we fulfill the wishes of all our customers on time.

Thanks to the R&D, Architect and Master team, inspired by the nature and working day and night, many different products come out every year. We meet a great need in the Modern Furniture industry with more than 700 product ranges.

How Do We Design?

Thanks to our architect team, we develop many R&D studies throughout the year in order to reveal the most ergonomic, useful and modern designs for our customers. In addition to all these, it is also important not to compromise on our quality. All of our products, which are inspired by nature and as a result of our respect for nature, are the work of our carefully selected architects.
