

Turbocharger Air Freshener Instructions

1. Front Cover

2. Cap

3. Cavity Space for Scent

4. Back Cover

5. Vent Clip

6. Vent Clip Extension

How to use:

1. To open the Turbo Air Freshener, you must first slide the **Cap (#2)** off. Twisting the cap can help if you are having difficulties.
2. Once the cap is removed, the **Front Cover (#1)** and **Back Cover (#4)** can be pulled apart. You may use the seams throughout the middle edges to help pull them apart.
3. Insert scent into the **Cavity Space (#3)**. Line up the shape and notches of the scent piece to the back cover.
4. Close the Turbo Air Freshener by pushing the Front Cover and Back Cover back together and re-inserting the Cap.
5. Insert the **Vent Clip (#5)** to the square notch located on the backside of the back cover.
6. If the vent clip is not long enough, you may use the **Vent Clip Extension (#6)**.
