

# LiquiCarn<sup>™</sup>

**Palatable Source of Pure,  
High Quality L-Carnitine**

**Net Wt. 4 Fl. oz (120 ml)**

**Amount per 1 ml:**

L-Carnitine (l-tartrate/CarniPure<sup>™</sup>) . . . . . 250 mg

**Recommended Usage:**

Dogs: 50-100 mg per kg, twice daily.

Cats: 250 to 500 mg daily.

*NASC certified  
for compliance with  
stringent supplement  
quality standards*

**LiquiCarn<sup>™</sup>** contains the purest and highest quality, medical-grade l-carnitine available in a veterinary product. The palatable liver-bacon flavored LiquiCarn is supplied in a 120 ml amber, glass bottle with a plastic, graduated dropper.

L-Carnitine is an amino acid that plays many roles within the body. Studies exist in veterinary species that define its role with cardiovascular disease, for patients with carnitine deficiencies, inflammatory hepatitis (including hepatic lipidosis), obesity, myopathies associated with a carnitine deficiency, and cysteine or urate urolithiasis associated with carnitine deficiency.

LiquiCarn's pleasing flavor and high l-carnitine concentration make it easy to achieve the therapeutic doses that have been defined by veterinary research studies.
