veterinarians's recommendation.

NASC certified  
for compliance with  
stringent supplement  
quality standards

**RxCurcuWIN ChewTabs** provide 40 mg of the powerful curcuminoid complex in each 250 mg hard-chew tablet. This convenient dosage format is small and easy to administer. These dosage-form tablets are scored for easy administration to smaller dogs and cats or can be administered whole. Curcuminoids have been found, through extensive research, to provide health benefits to the immune system through both up-stream and down-stream cell signaling molecules. The patented, hydro-soluble matrix of Curcuwin™ is why its curcuminoid complex provides vastly improved absorption over every other form of curcumin available today.
