

Rx Renal Feline Beadlets

NEW Tasteless Beadlets to Increase Compliance

A unique process that renders the taste completely bland and acceptable to your feline patient!

Rx Renal Feline Beadlets is a complex formulation of multiple botanical extracts and nutraceuticals. This unique formula has been enveloped with glycerol stearate, a bland, lipophilic material that renders the taste completely bland and acceptable to your feline patient. Rx Renal Feline beadlets can now be seamlessly blended in with your cat's renal diet without experiencing any problems with palatability.
