GemX™ IntelliFresh® Coffee Brewer with FreshTrac® Dispenser

Model: G4GEMXSIFTR10A3026*

Features

Reduce labor while increasing capacity – Up to 300% more capacity.

Reduce waste – Supports smaller batch sizes for slower dayparts.

Save valuable counter space – Narrow footprint uses 11% less width and 13% less depth.

Additional Features

Mobile coffee dispensers. Add/remove dispensers and warmers anytime and anywhere.

Increase cup quality and consistency. Restriction Brew technology prevents brewing if old coffee is detected in the dispenser. GemX ensures each dispenser is pre-heated prior to brewing, so every cup is served at the ideal temperature.

Next generation coffee dispensers. Modern design with large, color changing LED lights representing coffee freshness and volume. Keeps coffee fresh and hot for one hour, twice as long as glass carafe brewers.
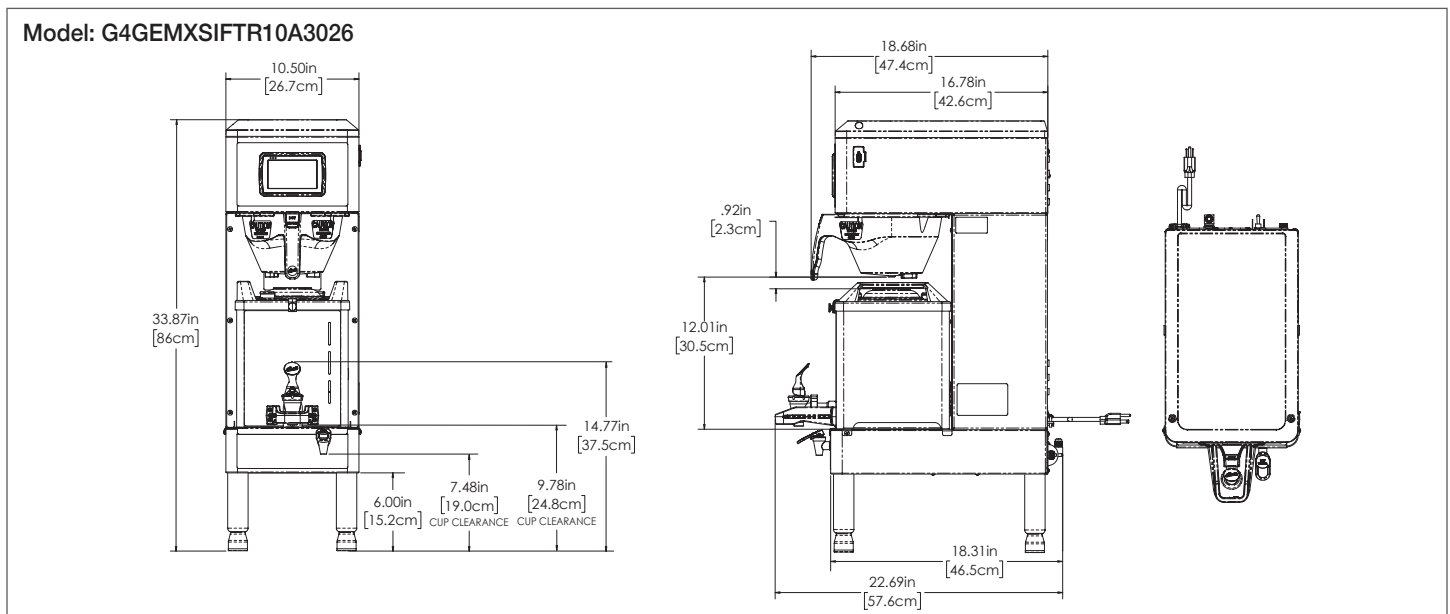

Plastic brew cone. Plastic maintains a consistent temperature during brewing unlike metal alternatives that quickly lose temperature resulting in inconsistent coffee flavor.

Automatic brew cone lock. Brew cone automatically locks into place during brewing process, preventing users from accidentally removing it.

Quick and easy updates. Software and recipe updates take less than 30 seconds through the USB port.

Minimize down time. The self-diagnostic system runs tests on critical components to troubleshoot and ensure service providers arrive with the right parts, minimizing down time. GemX also issues on screen warnings when water scale or pressure impact brewing.

Best in class warranty. GemX is backed by a 3-year parts and labor warranty on the digital control board and touch screen. All other components are supported with a 2-year parts and labor warranty. See warranty statement for full details.
