“I absolutely love my Stargazer units and I couldn’t have been happier with the quality and service from Luna Glamping.”

Amy Rivers, Verified Owner

Endless Opportunities

Applications for Geodesic Dome Kits

-  Glamping Tents
-  Parties
-  Weddings
-  Hotels & Resorts
-  Backyard Gazebos
-  Events & Exhibitions
-  Sports Events
-  Vacation Properties

Get cozy and take a breath of fresh air

Imagine an experience that combines your love of nature with eco-friendly luxury.

Glamping, or glamorous camping, combines the natural experience of a weekend in the woods with the comfort of home. Stargaze from the sofa with a glass of wine in hand, shower in privacy under the open skies, and drift off to sleep under your own comforter in a glamping dome.

The advantages of Geodesic Domes?

Geodesic dome homes are so much more than a conversation piece. Regardless of how your dome home appears in your dreams, these eco-friendly structures are good for your heart and wallet.

DURABILITY

Built with a hot-dipped galvanized steel frame, domes are as durable as they are affordable. This has helped the dome become one of the strongest housing alternatives.

FOUR SEASONS

With options for insulation and chimney stoves available, these easy-to-build structures can withstand winters in the tundra, summers in the desert, and everything in between. And, with the eye-catching hemispherical design, there's less home to heat and cool saving you money all year-round.

PORTABILITY

Built to be moved and removed as you need, even our largest domes can be put together and taken down in a day with the help of a few friends, making dome homes one of the most portable temporary or permanent residences available.

The Stargazer offers endless opportunities. Are you looking to create a dynamic glamping resort? A single studio dwelling? A business facility? Yoga studio or greenhouse?

Stargazer Geodesic Domes

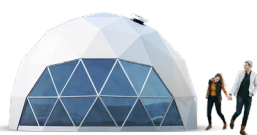

The Stargazer

Relax and enjoy the panoramic view of your surroundings in your geodesic glamping dome.

Nighttime brings on the “stargazing,” when you are able to admire the beautiful night sky from the comfort of your dome. The geodesic dome maximizes living space with a minimal footprint, rendering 30% more space with a third of the building materials and just as strong as a modern structure.

Depending on its size, your new Stargazer comes in 3v, 4v, or Kiewitt designs. Referencing the number of struts and their layout, these designs, also known as dome frequencies, give your Stargazer structural integrity and the ability to withstand heavy rain, gale-force winds, and Canadian winters.

5m Stargazer

Our smallest stargazer sized comfortably as a one bedroom or small office.

6m Stargazer

Our coziest Stargazer. Ideal for glamping couples, a studio space or office.

7m Stargazer

Ideal for glamping couples or as a workspace.

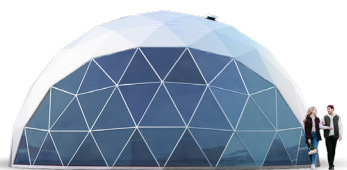

8m Stargazer

Small family glamping, a workspace or small yoga studio.

9m Stargazer

The midsize Stargazer with a little extra room, perfect for small family glamping or entrepreneur work.

10m Stargazer

Our large dome for an off-grid home, studio, events or vacation property.

12m Stargazer

Our extra large Stargazer. Ideal for family glamping and endless opportunities.

15m Stargazer

Our XXL Stargazer. Ideal for events, family gatherings and endless opportunities.

Stargazer Geodesic Domes

5m

Stargazer Geodesic Dome

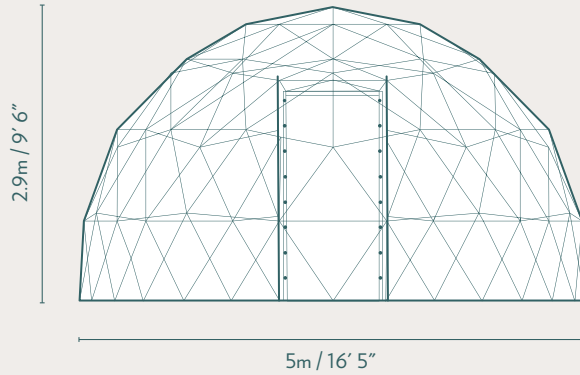

Our smallest stargazer sized comfortably as a one bedroom or small office.

The 5m Stargazer is best suited for a one bed glamping space, spare room or office space. Offering 19.6 sq m (211 sq ft), it can be customized with a small kitchenette or bathroom. A Murphy bed can be added for the optimal use of living space.

Stargazer Add-Ons

Two-Layer Insulation

Achieve a clean, finished look that helps save money on your heating.

This two-layer insulation combines an air barrier and cotton-based canvas to increase your energy efficiency and help you warm your space on cold spring nights and cool autumn mornings. Combine our two-layer insulation with a source of heat to turn your dome into a cozy space made for year-round stargazing.

Additional Specifications: Additional Specifications: Sections can be replaced when damaged or stained. The insulation is an 18mm thick thinsulate that is water and mildew proof as well as fire retardant. The interior of the dome is covered by a thick canvas available in white, khaki or grey, with custom colours available upon request.

SAMPLE DIAGRAM
Insulation panels

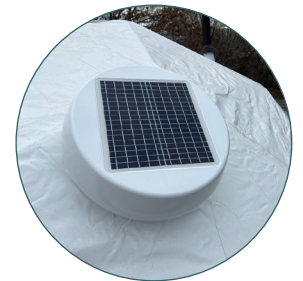

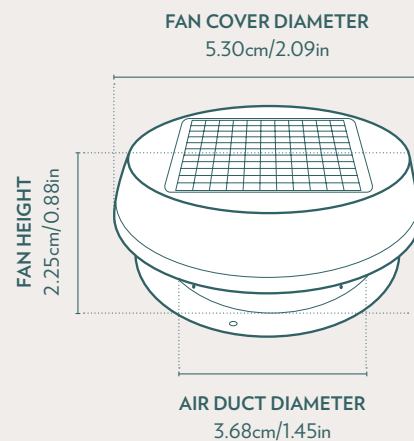

Solar Fans

The sun is blazing and the mercury rising, but it's cool inside your geodesic dome. How? Easy: through a solar-powered fan.

Powered by an 18W polycrystalline solar panel, the stylish fan with three 14" aluminum axial flow blades and galvanized steel enclosure keeps the air circulating on even the hottest summer days and removes moisture. Plus, there's a plugin included for days when the sun just won't shine.

Additional Specifications: 18V brushless DC motor, 17W 18V Polycrystalline solar panel. Available in Black or White.

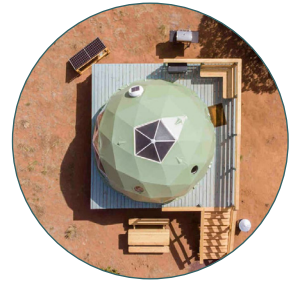

Rooftop Skylight

Stare into the stars in comfort.

Open the centre of the dome to the night with a custom-built skylight that lets natural light pour into your dome and makes staying up late to watch the stars a breeze. When paired with a motorized blind, our PVC skylight is the perfect addition to your new Stargazer.

Skylight Motorized Blind

Skylights are great until the sun comes up and cancels your plans for late morning rest and relaxation.

Shield yourself from the morning sun with a motorized blind for your skylight. And, with a handy remote and wired setup, you won't even need to get out of bed.

Comes with a remote control, wires into 110V power, comes with our three color options or custom color if requested. Hangs from the bars of the dome by four wires, one in each corner for easy leveling.

Curtains

Pull back the curtains and let in the light or shut out the first light so you can sleep in on Sunday mornings with curtains custom-built for your new geodesic dome.

This curtain kit is easy to install and includes the curtain rod and hangers. With curtains that cover the full height and width of the clear PVC window, you can choose when you want to see and be seen.

Additional Specifications: Black out curtains also help with insulation. These curtains feature a curtain track that attaches to the dome frame. The curtain is available in white, khaki or grey, with custom colours available upon request.

Keyless Entry (FOB)

Leave the keys on the nightstand and your worries at the door so you can spend a carefree afternoon paddling on the water or hiking through the forest.

With a punch code and fob access, keyless entry gives you and your guests easy and secure access to your new Stargazer.

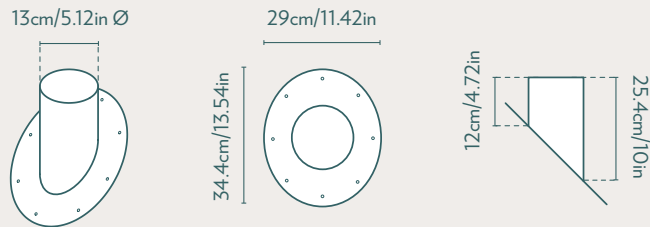

Add-ons: Stove Jack

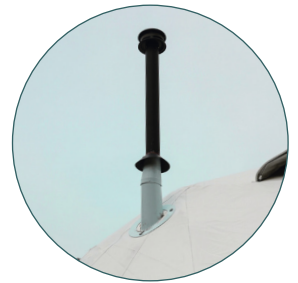

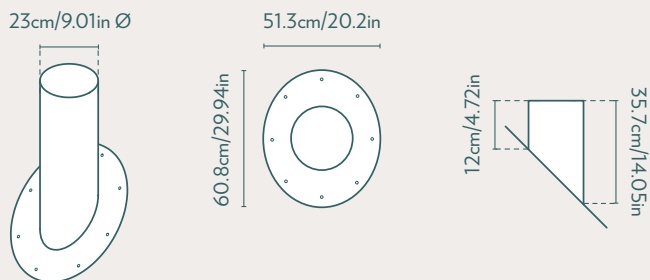

Stove Jack

Do you dream of a pellet stove in the dining room or curling up on the sofa with a good book and the crackle of a wood stove?

Our stove jack puts the decision in your hands. Just bring your own stove and choose a location within your dome. The insulation and PVC cover will be prepared to ensure a proper fit. 5" and a 9" stove jack available. Custom sizes available upon request.

9" STOVE JACK DIMENSIONS

Circle PVC Window (Non-Operable)

Nothing says comfort and tranquillity like natural light. Allow even more light to shine through your dome with a circle PVC window.

As a static window that cannot be opened, the circle PVC window is often located higher in the dome to welcome light into your living space.

Circle Glass Window (Operable)

Unlock your window and welcome the great outdoors inside with 400mm circle glass windows.

Held open by a ram, this window features a turn latch and is placed at a height where it can be easily used, often in row two between four and five feet from the ground.

Triangle Roll-up Mesh Window

Breathe fresh air into your space with a roll-up triangle mesh window that perfectly fits into the piping of the dome.

Featuring a removable screen, these windows are primarily used for ventilation and can be placed anywhere in rows one and two.

Add-ons: Glass Door

Glass Door

Let nature guide you from the entrance to the panoramic bay window while you keep your Stargazer secure with a locking glass door.

Made with aluminum and tempered glass, the door is lightweight and easy to use while still providing the sense of safety and security you need, whether you're building a new office space or a year-round glamping retreat.

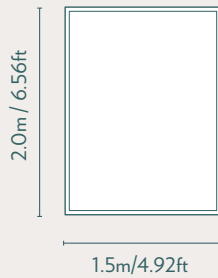

SINGLE DOOR FRAME

Inside 1.92m/6.3ft x 0.82m/2.69ft

DOUBLE DOOR FRAME

Inside 1.92m/6.3ft x 1.42m/4.66ft

Engineering Reports

Unlock structural engineering reports that make permits for your new dome home a breeze.

Conducted by a qualified Canadian engineering firm, your included report breaks down the wind, snow, and load ratings of your chosen geodesic dome as required by municipalities and local governments. This detailed report streamlines the permit process so you can spend less time on paperwork and more time connecting with nature in your new Stargazer.

Visit our website to download your included engineering report.
