Max Payload	2,536 lbs

It's like a huge wheelbarrow. Without the backbreaking part.

Sometimes you can't get a pick-up truck, or even a wheelbarrow, into a narrow, muddy or uneven job site. That's where Yanmar's heavy-duty, go-anywhere C12R rubber-tracked carrier comes in. With its 3ft-1in width, this rugged 10.5-hp high-flotation carrier easily navigates the tightest spaces and sloppiest conditions. When ceilings are low, just fold the ROPS bar down and kiss that wheelbarrow goodbye. And with its three-way dumping capacity, you can work quickly and efficiently almost anywhere.

INNOVATIVE FEATURES

Built To Take a Beating

A durable undercarriage is critical for any construction-use carrier. That's why the C12R is built with stronger materials, larger bearings and hardened rolling faces on the track rollers. The floor plate thickness of the rugged loading platform is 0.2 inch (4.5 mm) and the gatepost thickness is 0.1 inch (3.2 mm).

Three-Way Dumping System Comes Standard

Being able to tilt the dump bed left, right or out the front makes it easy to function in the most confined working conditions. Easily and quickly determine your dumping position by changing the location of two pins.

Foldable ROPS Bar

Not only is the standard equipment ROPS bar strong and sturdy, it can also be quickly folded down by simply removing a pin. This enables easy access to tight spaces with low ceilings, overhangs or other height-restricted jobsites, saving time and manpower.
