Discover Your Ring Size

Use a closed band ring you already own to determine your ring size with our ring sizer guide below. Make sure to use a ring with a similar band width and style to the ring you want to buy for greatest accuracy.

Step 1

Print this document out to 100% on an A4 paper - ensuring that scaling is set to 'none'. Check the print out size by measuring the line below with a ruler. It should measure exactly 5cm.

Step 2

Place your closed band ring on the circles below to find the circle which has an **outside edge** that best aligns with the **inside edge** of your ring.

Step 3

The circle below that best fits the inside of your ring is your ring size. If your ring falls somewhere between 2 sizes you should always opt for the larger size.
