

Ladder Barrel Assembly Instructions

Step 1: fit ladder to main frame using 4 bolts supplied and tighten.

Step 2: fit side panel to barrel, using 3 bolts supplied. Do not tighten at this point.

Step 3: fit remaining side panel to other end of barrel, with 3 bolts. Do not tighten.

Step 4: fit gusset with 4 bolts, do not tighten.

Step 5: remove clamp bars from main frame.

Step 6: lower barrel assembly onto clamp bolts and slide in either direction until side panels are stopped against the bolts.

Step 7: re-fit clamp bars, washers and hand nut. Now tighten all of the bolts in the barrel and gusset.

Loosen hand nuts and check that barrel assembly slides smoothly.

Ensure that hand nuts are always tight during barrel use.
