

Vinyl Trapeze Board unpacking

*Please note due to the length of the board, this is a two person job.

- Gently remove loose packing foam from around sides of box leaving Trapeze Board covering on board
- Remove board carefully from box and take out the foam protection pieces gently
- With assistance, pick up the board at each end and rest against the wall safely whilst you assemble steel frame
- Do not drag board across floor and be aware of any doorways or walls when maneuvering into room
- Do not remove foam protection until ready to assemble on frame
- No warranty claims can be accepted on damaged vinyl

Thank you
