# Our Story

Play and Store Founder, Chantal was a child of the sea always mesmerized by collecting shells and beautiful beach rocks. She always referred to nature as being the world's most creative designer. As a child her dream job would be to become an archeologist or work for National Geographic.

Chantal moved from Holland to Spain to live with her surf-loving husband. Now a family of four, they love spending time at the ocean just as Chantal did as a child. You can always find their two sons surfing and near the water.

When the idea of Play and Store was born, it was very important to Chantal to create the highest quality, non toxic family products that would last for years to come as well as be able to give back to a part of her life that had given her so much - the ocean. Play and Store believes in keeping the oceans clean, helping marine animals and leading the way to a better future to our next generations.

# Giving Back 10% of Every Purchase

With every purchase from our website, we give back 10% to non-profits organizations such as the Hawai'i Wildlife Fund, The Ocean Cleanup, and Ocean Conservancy. These organizations help to keep our beaches clean and protect marine life around the world.

We believe that contributing even a "little grain of sand" can help to achieve a better world for future generations both on land and sea.

Play and Store has supported:

**HAWAI'I WILDLIFE FUND**

**OCEAN CONSERVANCY**

**THE OCEAN CLEANUP**

Our Premium Lunch Bag includes an inside mesh pocket to easily store your cutlery or even money and cards to keep everything inside organized and easy to get to the beach, play and store.

Also a shell name tag so your lunch bag can not be lost.

Our Premium Beach Bag maintains the elegance and avant-garde design of the Premium Line using non-toxic and water resistant materials and is wipe clean on the outside. The bag is square shaped with a wide inner space allowing all of your family's towels, lunch, toys and more to fit perfectly inside. We have added a mesh bottom so that wet or sandy items can be carried without bringing the beach home with you. At the same time it allows air to flow through towels and bathing suits inside, drying them out rather than keeping the moisture in.
