## Adjustable and Standoff Post Bases

Additional standoff bases are on p. 331.

The AB series of retrofit adjustable post bases provide a 1" standoff for the post, are slotted for adjustability and can be installed with nails, Strong-Drive® SD Connector screws or bolts (ABU). Depending on the application needs, these adjustable standoff post bases are designed for versatility, cost-effectiveness and maximum uplift performance.

**Features:**

- The slot in the base enables flexible positioning around the anchor bolt, making precise post placement easier
- The 1" standoff helps prevent rot at the end of the post and meets code requirements for structural posts installed in basements or exposed to weather or water splash

**Material:** Varies (see table)

**Finish:** ZMAX® and some in stainless steel; see Corrosion Information, pp. 12–15

**Installation:**

- Use all specified fasteners; see General Notes.
- See our *Anchoring, Fastening, Restoration and Strengthening Systems for Concrete and Masonry* catalog, or visit [strongtie.com](http://strongtie.com) for retrofit anchor options, such as *Titen HD®*, *Stainless-Steel Titen HD* or *SET-3G™*.
- Post bases do not provide adequate resistance to prevent members from rotating about the base and therefore are not recommended for non-top-supported installations (such as fences or unbraced carports).
- Place the base, cut washer(s) or load transfer plate(s) and nut(s) on the anchor bolt(s). Make any necessary adjustments to post placement and tighten the nut securely on the anchor bolt.
- See [strongtie.com](http://strongtie.com) for information on hollow column installation.

**ABW**

Place the standoff base and then the post in the ABW and fasten on three vertical sides, using nails or Strong-Drive SD Connector screws  
 – Bend up the fourth side of the ABW and fasten using the correct fasteners

**ABU**

Place the standoff base and then the post in the ABU  
 – Fasten using nails or Strong-Drive SD Connector screws or bolts (ABU88Z, ABU1010Z, ABU1212Z – SDS optional)

**ABA**

Place the post in the ABA  
 – Fasten using nails or Strong-Drive SD Connector screws

**Codes:** See p. 11 for Code Reference Key Chart

## Allowable Loads — Beam Installation

Model No.	Nominal Beam Size	Material (ga.)		Dimensions (in.)			Fasteners (in.)		DF/SP Allowable Loads		SPF/HF Allowable Loads	
		Base	Strap	W	L	H	Anchor Dia.	Nails	Uplift (160)	Down (100)	Uplift (160)	Down (100)
ABU46Z	Double 2x	12	12	3 5/8	5	7	5/8	(12) 0.162 x 3 1/2	2,030	8,475	1,820	6,075
ABU46Z	4x	12	12	3 5/8	5	7	5/8	(12) 0.162 x 3 1/2	2,155	9,890	1,850	7,090
ABU46RZ	Rough 4x	12	12	4	6	6 3/4	5/8	(12) 0.162 x 3 1/2	2,155	9,890	1,850	7,090
ABU66Z	Triple 2x	12	10	5 1/2	5	6 1/8	5/8	(12) 0.162 x 3 1/2	1,405	12,715	1,165	9,115
ABU66Z	6x	12	10	5 1/2	5	6 1/8	5/8	(12) 0.162 x 3 1/2	1,905	12,920	1,640	11,110
ABU66RZ	Rough 6x	12	10	6	6	5 13/16	5/8	(12) 0.162 x 3 1/2	1,905	12,920	1,640	11,110

1. Uplift loads have been increased for earthquake or wind loading with no further increase allowed. Reduce where other loads govern.
2. Downloads may not be increased for short-term loading.
3. Specifier is to design concrete and anchorage for uplift capacity.
4. Beam depth must be a minimum of 7 1/4".
5. Shims are required for double 2x (1 shim) and triple 2x (2 shims) installations as shown in the illustration. Additional fastening of shim to beam is not required.
6. **Fasteners:** Nail dimensions are listed diameter by length. See pp. 21–22 for fastener information.

## Adjustable and Standoff Post Bases (cont.)

These products are available with additional corrosion protection. For more information, see p. 14.

**SS** For stainless-steel fasteners, see p. 21.

**SD** Many of these products are approved for installation with Strong-Drive® SD Connector screws. See pp. 348–352 for more information.

- Uplift loads have been increased for earthquake or wind loading with no further increase allowed. Reduce where other loads govern.
- Downloads may not be increased for short-term loading.
- Specifier is to design concrete and anchorage for uplift loads.
- ABU products may be installed with either bolts or nails (not both) to achieve table loads. ABU88Z, ABU88RZ, ABU1010Z, ABU1010RZ, and ABU1212Z/RZ may be installed with eight 1/4" x 3" Strong-Drive SDS Heavy-Duty Connector screws (sold separately) for the same table load.
- For higher downloads, pack grout solid under 1" standoff plate before installation. Base download on column or concrete, according to the code.
- HB dimension is the distance from the bottom of the post up to the first bolt hole.
- Structural composite lumber columns have sides that show either the wide face or the edges of the lumber strands/veneers. For SCL columns, the fasteners for these products should always be installed in the wide face. See technical bulletin T-C-SCLCLM at [strong-tie.com](http://strong-tie.com) for more information.
- Downloads shall be reduced where limited by allowable loads of the post.
- Fasteners:** Nail dimensions are listed diameter by length. See pp. 21–22 for fastener information.
