

# We Recycle!

## Plastic & Cardboard Policy

### Plastic

- We no longer offer plastic bags for sale at our tills or plastic straws in our restaurant and all our takeaway items are in biodegradable packaging. The bags we have at our tills are charged for and either paper or jute.
- We are committed to supporting plant suppliers who grow in coloured pots which can be recycled with kerbside collection. We also offer a pot recycling station in store for our customers to bring their waste pots and trays from home which we will bale and recycle on their behalf.
- Our product sourcing is continually adapting to reduce plastic waste produced and we support those suppliers who have reduced their plastic packaging and introduced new technology to recycle plastic products (bottles etc.) into quality consumer goods.
- We re-use the majority of plastic that comes into our site as packaging for parcels sent online.
- Onsite we crush and bale any excess plastic for collection by our waste management company.

### Cardboard

On site we re-use the majority of cardboard that comes in from suppliers by shredding and using it as packaging for our online orders or re-using the boxes if they are sturdy enough. Any excess cardboard is crushed and baled for collection by our waste management company.
