

# Support Local!

## Product Sourcing Policy

Our sourcing is continually under review, and we are focusing on reducing our impact through sourcing our product range locally where possible and selecting suppliers with reduced environmental impact. We promote these ranges heavily instore to encourage our customers to shop in the same way.

- Our farm shop stocks lines from over 75 producers based in Wales & Herefordshire
- 85% of our outdoor plants are grown in UK nurseries
- Our restaurants use local meats, bread, eggs, cheese & drinks where possible
- Our ranges of locally made gifts and fair-trade products are continually growing with one of our most popular candle collections made just 10 miles away in Brecon!
- Our product sourcing is continually adapting to reduce plastic waste produced and we support those suppliers who have reduced their plastic packaging and introduced new technology to recycle plastic products (bottles etc.) into quality consumer goods.

- We are committed to supporting plant suppliers who grow in coloured pots which can be recycled with kerbside collection.
- We stock some collections of plants grown in peat free composts whilst encouraging and supporting more of our suppliers to introduce more peat free collections.
