

# 'Wood' you like to know... Our Sustainably Sourced Wood Policy

**We are committed to sourcing wooden products from reputable suppliers that support the sourcing wood from sustainably managed forests.**

**The majority of our wooden products proudly display logos that confirms that the forest is being managed in a way that preserves biological diversity and benefits the lives of local people and workers, while ensuring it sustains economic viability. Certified forests are managed to strict environmental, social and economic standards.**

**There are ten principles that any forest operation must adhere to before it can receive forest management certification. These principles cover a broad range of issues, from maintaining high conservation values to community relations and workers' rights, as well as monitoring the environmental and social impacts of the forest management.**
