Edition July 2012

First German edition in print: September 2003: Third edition with minor revisions and English translation by Dipl. Psych. Jonathan Harrow: May 2010 – July 2012.

Although this seminar transcription has been compiled with the greatest of care, factual errors cannot be ruled out completely. Only the latest current edition is binding. If in doubt, please check with Holimed to ensure you have the latest edition.

All information and data in these documents may be changed without prior notice. This seminar presents information on the basic principles of working with EAV and bioresonance. Any application guidelines should be viewed as suggestions based on our own prior observations; they are not binding. For detailed application guidelines, please refer to the relevant specialist literature.

Apart from ensuring the printing quality, Holimed accepts no responsibility and liability for these documents.

Holimed makes no (implicit) warranties for either merchantability or fitness for a particular purpose.

Holimed also accepts no responsibility for any errors in the present document.

No responsibility is taken for incidental or consequential damages related to the delivery of, services rendered with, or use of this material.

#### Safety notice: Please read carefully

Please pay attention to the safety notices and advice in the *bioswing*, RemiWave *Pro*, *WaveMaker*, *WaveMaker Pro* and *biocheck* operation instructions manuals if you use these instruments.

In line with the latest CE regulations of the European Union and their national ratifications, we wish to point out that electroacupuncture according to Dr. Voll and bioresonance in general currently do not have the status of "recognized methods of diagnosis and treatment." According to current regulations, *bioswing, biocheck, WaveMaker, WaveMaker Pro and* RemiWave *Pro* are not medicine products but systems of alternative medicine for restoring energetic balance and particularly acupuncture nodes.

The EAV meridian names originate from experiences acquired through energetic tests. Like in the Traditional Chinese Medicine (TCM), the meridians were not proven scientifically

All information on this presentation is related to energetic treatment.

## Any form of energetic treatment does IN NO CASE replace traditional MEDICAL TREATMENT.

## **Treatment methods**

1. Using invasive procedures Surgery, neural therapy photodynamic therapy, acupuncture

2. Using substances

Chemical medication, phytotherapy, taking minerals

### 3. Using energy

Heat, vibration, sound, electrical acoustics, galvanic current, electromagnetic waves

4. Using information (energetic methods) High-potency homeopathy, Bach flower remedies, gemstone therapy, bioresonance/EAV

### **Illustration 17b**

### **Typ I Allergies**

(acc. Dr. Schumacher)

#### Acute forms:

Inhalation allergy, Pollinosis, A. against animal epithelia, chemicals scents, foodstuff, drugs. AL, Skin, LU, SN, CT, LI/SI

#### **Chronical form:**

Antianaphylaxis, masked out by habituation (see Prof.Rinkel)

Neurodermatitis, chronic "endogenous" bronchial asthma, ulcerative colitis

- gene	ral	
--------	-----	--

- skin

AL Skin

- bronchial system LU
- intestines

LI/SI

### **Other 'Allergies'**

(acc. Dr. Schumacher)

#### **Pseudoallergy:**

Incompatibility, similar to the allergic reactions, without immunological mechanisms

 reaction depending on quantity (e.g. azo colors, benzoate, phosphate, PHB-Ester), SN

#### Intolerance reaction :

- by the lack of enzymes in the digestion
- by high histamine supply

Symptoms in contrast to "genuine" allergies: weariness, exhaustion, nerviness, concentration disorders, migraine, anxiety states, depressive resentment.

# The Rules for using the bioresonance at allergies

- 1. Use 3 minutes Balance in inverse (Ai)/Automatic Mode before the EAV-measurement or other energetic tests.
- 2. Do the Resonance Test on the nodes which are irritated and seem "not relevant to the allergy." Then transfer the samples using bioresonance to approximately normalize these nodes. (usually 5-6 minutes non-inverse (A) / Automatic Mode)
- Now test the allergen (or toxin) samples on the relevant nodes. (inverse (Ai), or natural(A) depending on the client's situation)
- **4.** Select only those samples which show the strongest reaction on the nodes.
- Transfer these substances one by one to the client, choose 3 or 5 minutes for each sample in inverse (Ai) / Automatic Mode.
- 6. At each 3rd treatment test the reaction of the client. If no reaction is measurable anymore then transfer the information again at least once more.

This works the same way for the test of energetic influences of toxins.

## Reduction of an Energetic Load by Bioresonance

### Measurement in inverse (Ai) (e.g. Allergens) or non-inverse (A) (e.g. Testkit Modules)
