## VIKING ATV TANK-TOP SADDLEBAGS INSTRUCTION

### Parts

Viking ATV Tank Top Saddlebags  
Velcro Tape x 2

### Instructions

#### **Step 1**

Remove the fuel tank cap and place the Tank Top Saddlebags on top of the tank such that the hole in the saddlebag yoke aligns with the fuel tank hole. Reinstall the fuel tank cap.

#### **Step 2**

With bags hanging at their desired position, stick the provided Velcro tape to the side of the ATV tank where the Velcro strip on the bag touches the side of the fuel tank. Do this for both sides. The Female Velcro strip on the back of the bag will attach to the Male Velcro tape on the bike. This prevents bag from swinging freely while riding.

Fig (A)

### **⚠ Warnings**

- ✓ Riding with improperly installed is dangerous and can lead to accidents.
