VIKING ENDURO FENDER BAG INSTRUCTION

Installation

Step 1

Place the fender bag on top of the front fender as close to the headlight as possible.

Step 2

There are 2 straps on each side of the fender bag with metallic hooks attached. With the straps hanging on both sides, slowly pull the straps until the hooks catch the lip of the fender on both sides.

Step 3

Pull the straps further to create tension in the straps until the bag is securely fixed in one place. See Fig. A for reference.

Metallic Hooks

⚠ Warnings

- ✓ Vikingbags is not responsible for any damage or accident resulting from improper installation of the fender bag.
- ✓ Before riding, always make sure that all the straps are tight and the bag is installed securely.
