

MYCORRHIZAL FUNGI ARE ESSENTIAL ALLIES FOR STRONGER, STRESS-RESISTANT PLANTS.

- **Professional Grade Quality:** High spore counts, reliable shelf stability, and consistent results.
- **Create a Nutrient Network:** They extend into the surrounding soil, increasing the root system's surface area.
- **Enhance Nutrient & Water Uptake:** These filaments scavenge for nutrients (especially phosphorus and nitrogen) and water, delivering them back to the plant.
- **Boost Stress Resistance:** Help plants survive drought, poor soil conditions, and even some pathogens.
- **Improve Soil Structure:** Their fungal networks help bind soil particles, improving aeration and water retention.

Enhanced
Transplant
Success

For **ALL**
Crops.

- Mycopro Ag COMPLETE is a Blend of 9 endomycorrhizal species and 9 ectomycorrhizal species
- Suspendable powder mycorrhizal inoculant that can be sprayed onto bare roots, used as a root dip, drenched into porous soils, hydromulched, or blended into potting media.
- Covers a broad range of host plants.

A Complete Solution for Every Crop

Nurseries grow a wide variety of plants—and each species has different mycorrhizal needs. **Mycopro Ag Complete** is formulated with both **endomycorrhizae** and **ectomycorrhizae**, making it the **go-to inoculant for diverse plant production**.

- Ideal for **woody ornamentals, perennials, annuals, trees, shrubs, and grasses**
- Designed for **container nurseries, bare-root starts, and in-ground production**

Whether you're producing native plants, landscape trees, or vegetable starts, Mycopro Ag Complete delivers universal biological support in one easy application.

ABOUT PLANT REVOLUTION

Plant Revolution is leading the way in mycorrhizal innovation for agriculture. As a family-owned company based in California, we are committed to producing the highest quality inoculants for professional growers. Our products feature unmatched species diversity, professional-grade consistency, and user-friendly application—helping farms of all sizes unlock healthier roots, stronger crops, and better yields. Trusted by growers across the U.S., we stand by science, service, and soil health.
