

OkBox

Modular Outdoor Kitchen System

OkBox - Time to get outside

For countless centuries, memories have been made over meals consumed in the great outdoors. Whether it's the fresh air, the enhanced awareness of your surroundings, or just the feeling of freedom, there is little doubt that food just seems to taste better outside.

Preparing and eating a meal outdoors is perhaps the surest way to ensure it's an experience your guests will never forget. It's time to leave the primitive facilities we traditionally associate with outdoor cooking behind and move into a brave new world.

What is an OkBox?

This is the culmination of years of experience and research into the science of preparing food in the great outdoors. OkBox introduce to you the ultimate solution for al fresco dining: our modular range of kitchen boxes. These form the building blocks that make the open-air kitchen area you dreamed of become a reality.

Practical, hard-wearing, adaptable, and supremely stylish – the future of outdoor entertaining has arrived.

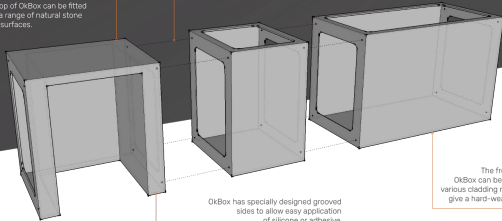

outdoorlivingdesign.co.uk

The top of OkBox can be fitted with a range of natural stone work surfaces.

The unique modular design means OkBox can be connected together in any combination of ways – making it easy to create the perfect outdoor cooking area for any space.

OkBox has specially designed grooved sides to allow easy application of silicone or adhesive.

The front of each OkBox can be faced with various cladding materials to give a hard-wearing finish.

How does it work?

OkBox is formed from 9mm thick glass reinforced fibre concrete. This material is ideally suited for this application, being both durable and resistant to temperature fluctuations. Once installed, OkBox can be custom finished with any material of your choice – tile, render, wood or slate.

OkBox is available in 11 different sizes, which you can use to create your own unique configuration. The only limit is your imagination!

a) Design and bolt OkBox together

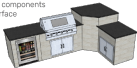

b) Cut out OkBox ready for components

c) Clad the outside of OkBox

d) Finally, add components and work surface to OkBox

1

Design process

Our experienced team of outdoor kitchen experts will guide you through the different options available to create an al fresco dining area perfectly suited to your needs.

2

Assemble boxes

Once the design has been agreed, OkBox can be located and bolted together. OkBox can then be cut out ready for your chosen components.

3

Installation

OkBox has been designed for professional installation, however is simple enough to be installed by a competent DIY enthusiast.

4

Finishing touches

OkBox is designed to have cladding of your choice - porcelain, wood, slate or fibreboard. The top of the OkBox can be fitted with a natural stone work surface of your choice.

The OkBox

Strong 9mm thick construction pre cast.

Open sides with pre-drilled holes allow flexibility for services to be neatly routed inside the units.

Glass reinforced fibre concrete box with grooved sides for simple application of silicon or tile adhesive.

outdoorlivingdesign.co.uk

Any size of outdoor built-in barbecue can be accommodated in the OkBox.

OkBox is designed to allow holes to be cut in the side and top so your desired built-in barbecue, drawer, or cupboard storage option can be fitted.

11 sizes available bolted together using stainless steel bolts.
