

Good News! These trees are less than 5 minutes off HWY 36, less than an hour from civilization, and they are easy to find.

Directions: From hwy 101 north or south in Red Bluff, take hwy 36 west for approx 45 miles. Turn right onto US Forest Service road 29No2D (The road is well marked, but you might want to get a US Forest Service map from their website.)

Follow the road up as it makes a sharp right curve, and then a left curve. At the next right curve (less than 1 mile from hwy 36) there will be a parking area on the right side of the road. Park there. Our trees are located in Gulch 2, directly across the road from the parking area. The slope has easy access and is not hard to climb, but bring hiking boots!
