## Far-flung

The Litoral Collection comes from artisanal communities within the Litoral zones, isolated regions of Argentina. Their time-honoured weaving technique uses leaves from palm trees to create bags for collecting fruit, fishing nets and traditional costumes. Pampa works closely with these communities to share the fruits of their labour with the world, of which the "Litoral Palm Basket #4" is one.

## Comes in Handy

A timeworn and weary bag unearthed in an op shop became the inspiration for the "Leather Mesh Tote" by All The Kings Men. Their version is made in Melbourne and cut from a single piece of leather. The tote sits flat for storage and expands when lifted by the handles to naturally gape: makes it the perfect vessel for groceries, books, towels and all manner of personal effects.
