

DIABLO DTF TRANSFER APPLICATION INSTRUCTIONS.

Thank you for choosing Diablo DTF for your printed transfers.
For optimal results and longevity, please follow the steps outlined below.

Step 1: Preparation

Ensure the garment or fabric where you'll apply the transfer is clean and wrinkle-free.

Step 2: Application

Set your heat press to a temperature of 160°C (320°F).
Position the DTF transfer onto the garment or fabric, ensuring it's properly aligned.
Press the transfer using medium pressure for 10 seconds.

Step 3: Peeling

Once pressed, you can peel the transfer either warm or cold based on your preference.

Step 4: Optional Finishing Press

For an improved finish and to remove any possible excess transfer glue, give it a secondary press for 5 seconds using medium pressure.

Tips:

Ensure your heat press is calibrated correctly to avoid overheating or under-heating.
Store unused transfers in a cool, dry place away from direct sunlight.
Thank you for trusting Diablo DTF from teeone. If you have any questions or need further assistance, don't hesitate to contact our support team on **01793 881333**.

LEVEL THE PLAYING FIELD WITH DIABLO DTF - THE UK'S MOST AFFORDABLE DIRECT TO FILM SOLUTION - WIN MORE CUSTOMERS, MAKE MORE MONEY!
