

FALCON ELECTRONICS

WIRED LICENSE PLATE BRACKET BACKUP CAMERA KIT

Instruction Manual

General introduction:

- This reverse backing system is designed for vehicles to increase their rear view viewing potential to help reduce backup accidents
- The 4.3 inch monitor works with the reverse camera to show the images behind your vehicle as you reverse
- ***Install (self or professional):*** Installation should take about 30-60 minutes for self-installation. Installer must be able to find and tap power into reverse back light. Please visit www.topdawgelectronics.com to learn more about installation. Also, visit our YouTube channel (search Top Dawg Electronics) to see a demonstration on how to install this backup camera. If you do not have the technical ability to install this camera, professional installers located at car stereo retailers and other auto electronics locations should be able to install this camera for you for a cost of \$75-200, depending upon your location and installer.

Specifications:

Monitor

Product Features

1. Automatically shows the reverse picture when the vehicle is reversing. Assists driver with the ability to park safely. When the reverse gear is engaged, the system automatically starts to find the camera signal and display the backup video. The system switches off automatically when the vehicle is no longer in reverse gear.
2. The assisted night vision potentially helps people parking in a dark environment.

Attention

When connecting the power cable, please make sure not to mistake the positive and negative pole, otherwise the system will burn out. Please make sure the red cable connects to the positive reverse light electrode. The black cable connects to the negative reverse light electrode.
