Important operation notice: Bluetooth® pairing

Bluetooth® pairing is the phrase used for Bluetooth® products use: it makes the Bluetooth® devices connect wirelessly to other devices via simple operation. For example, you must enable the Bluetooth® function on your mobile phone or device, if you want to use the mobile and Bluetooth® headset, then put the headset in pairing mode and search for the headset in your bluetooth function on your device, pair and connect by password.

FEDESH02 Bluetooth® Stereo Headset Pairing:

1. Make sure the headset is off (see Switch on/off)
 2. Press and hold multifunction key for 7 seconds until red and blue LED flash alternately.
 3. Follow the operating instruction of your Bluetooth® mobile phone to start the pairing process, Typically, this is done by going to a " Connect" or "Setup" menu and then selecting the option to search the Bluetooth® devices.
 4. The mobile device will find FEDESH02 and ask you if you wish to connect your mobile with this headset. Press "Yes" or "Confirm" to confirm this action.
 5. Enter password or PIN 0000, and press "Yes" or "Confirm".
- (Notice: If the connection is successful, the blue LED of the headset will flash 3 times. Then blue LED will flash one time every 7 seconds. If the pairing is unsuccessful, the red and blue LED will continue to flash alternately. You please turn off the headset and begin pairing again.)

Voice dialing (dialing a number by saying a name)

Voice dialing is available if the voice recognition is turned on, and bluetooth® headset has been paired

1. Press multifunction key of the headset one time, you will hear a beep.
2. Say the name of the person you wish to call clearly (Notice: Your device must support voice dialing function)

Troubleshooting:

If disconnection occurs, please check the following factors:

1. Ensure that the headset has enough power, is turned on and has been successfully paired to the mobile.
2. The Bluetooth® function of the mobile is enabled.
3. Ensure the distance between the headset and mobile is not over 30 feet, or there is wall or other disturbance or other electrical devices between headset and mobile.
4. Bluetooth® music devices or the music devices with Bluetooth connector /Bluetooth® stereo dongle must support A2DP.
5. Some mobile can support the switching between music

and calling for Bluetooth® connection, while other phones will not support this function.

Battery information:

Your device is powered by a rechargeable battery. The full performance of a new battery is achieved only after two or three completed charge and discharge cycles. The battery can be charged and discharged hundreds of times, but it will eventually wear out.

Please disconnect the connection between charger and headset when not charging. Do not leave a fully charged battery connected to a Charger for over 24 hours, since overcharging may shorten battery lifetime. If left unused, a fully charged battery will lose power over time. Leaving the device in extreme hot or cold temperatures, such as in closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. A device in extreme hot or cold environments may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing. Do not dispose of batteries in a fire as they may explode. Battery may also explode if damaged.
