- CH3 Trigger
- CH2 Trigger
- ACC+
- ACC
- GND

Power Wire Connections

The only way to fully power device is to disconnect the power wire harness from the main power source.

Option 1

Recommended Option

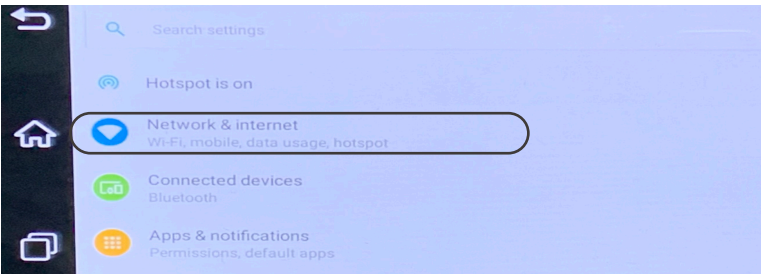

APN SETUP

STEP-01: Click Open "Settings" => Enter Password: 999999 (six nines) => Other => More

STEP-02: Click "Network & Internet" => Mobile Network

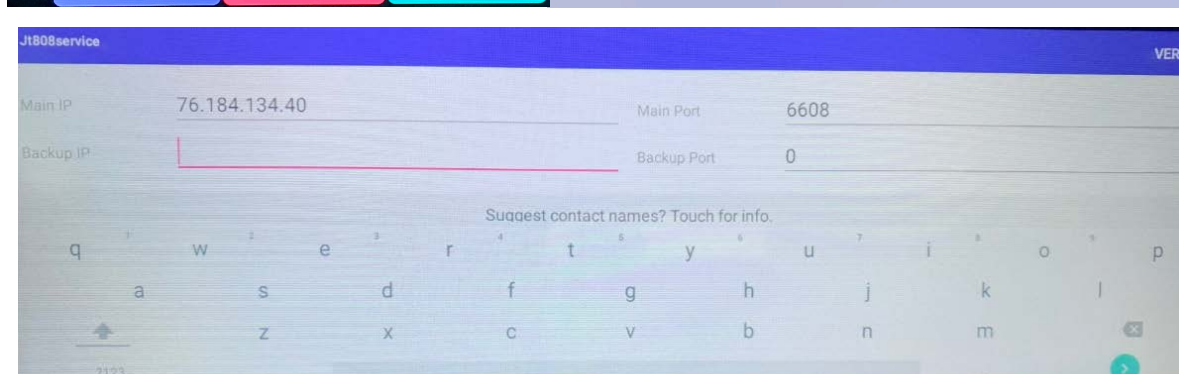

STEP-03: Click "Advance" => Click "Access Point Names" => Edit APN of your 4G SIM Card => Done

SETUP SERVER IP

STEP: Click Open "APNs" => Click jt808 Service => Setup Server IP and Server Port => Click "Submit" to Save

Main IP= Server IP - verify that 76.184.137.40 is entered Backup IP leave blank

WIFI SETUP

STEP-01: Select "Settings"=>Under Setting Menu =>"Select WLAN"=> Select Your WIFI Network=> Enter Your WIFI Network Password. This will allow for remote viewing using Web Server Falcon IP address. Must use the CMSV6 or CMSV7 mobile app to view cameras remotely.

Device Internal Hot Spot Setup

On device=> Select Settings Menu=> Under settings, select "SoftAP" to enable Internal device WIFI Hot Spot Function.

Open WIFI network settings on mobile device. Search and Select WIFI network "FX-PF89".

Enter password that is given within your device settings.

Use either the CMSV6, CMSV7 or CarAssist mobile APP to view cameras, playback, track. This will not allow for remote viewing using Web Server Falcon IP address. Cameras are only viewable when connected to the internal hot spot.

BLUETOOTH

Mobile Device Bluetooth Connection Process:

Step 1. Open Bluetooth settings on mobile device. Search and Select BT device "FX-PF89". Select "Pair". Select option to sync contacts or not.

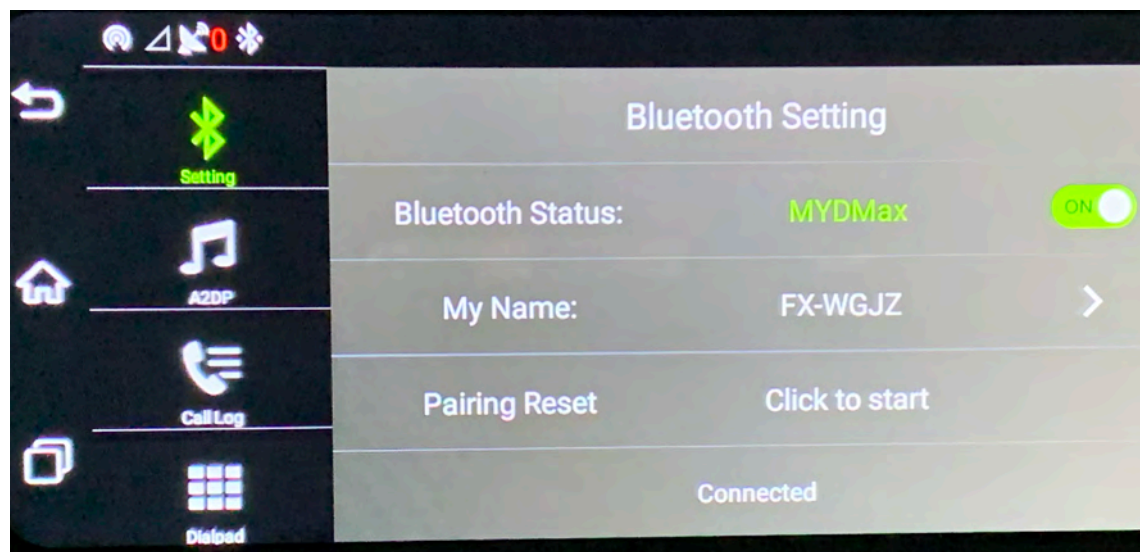

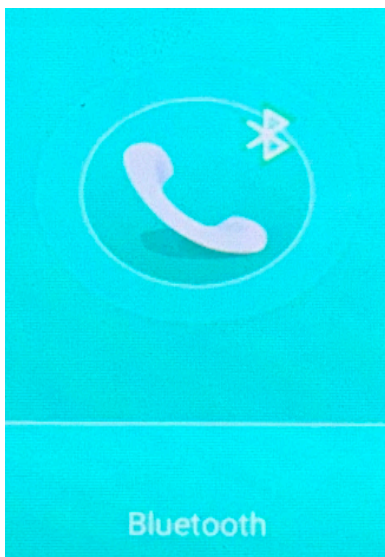

Step 2. Once connected, Select BT setting on device. Confirm that you are connected to device.

Connecting via Bluetooth allows you to make mobile calls directly from the device, and play mobile audio playlist. The sound will come from the internal dash cam speaker. Control the volume within the device Settings. Connection and data usage will come from your mobile carrier, not the dash cam sim card carrier.

Connecting mobile device to Bluetooth will not get your device Online for remote viewing.

Device Bluetooth Connection Process: Select Bluetooth Settings and verify Bluetooth Status.

Parking Monitor / Auto Sleep

STEP-01: Select "Settings"=>Other

STEP-02: Select "Auto Sleep"=>Setup Sleep time

STEP-03:

Check "Enable Wakeup by Collision"=>

Check "Allow Video Lock"=>

Setup "Collision Detection Sensitivity" based on your preference.=>

Restart=>

Setup Settings Done

Parking Monitor / Auto Sleep is Enabled

Auto Sleep mode setup time frame options: 15/30/60minutes or NEVER after vehicle is stopped

Conditions for Parking Monitor / Auto Sleep Mode:

- Condition-01: When engine is shut off, the device monitor will remind you that it is going to sleep mode in 20 seconds. You can choose to "Cancel auto sleep" or select "Now" to enable auto sleep
- Condition-02: When vehicle is parked for 15 Minutes, the device monitor will remind you that it is going to sleep mode in 20seconds. You can choose to "Cancel auto sleep" or select "Now" to enable auto sleep

Parking Monitor / Auto Sleep Mode:

Monitor and camera are both turned off and recording has stopped.

If motion / G-Sensor is detected / activated, device will automatically power up and start to record video(monitor stays off)

Motion / G-Sensor videos will automatically record and save(lock) 20s of video to micro SD card and then will back into sleep mode again

Once vehicle is started, recording mode will go back to normal.

Additional Notes: Device automatically shuts down when Low Voltage is detected:

DC12V,10.5V / DC24V,20.8V

Push Power Button on Monitor to disable Sleep Mode

The only way to fully power device is to disconnect the power wire harness from the main power source.

PLAYBACK

STEP: Select "Video Player"=> Select " F", "B", "R", "L" cameras that you want to view playback recordings.
