It is recommended that you FORMART SD card.
- Press bottom right "OK" button, make sure camera is not recording.
- Once camera is not recording, press bottom left, menu button
- On menu screen you have two menu setting options
  1) Video Movie Mode Settings
  2) General settings
- Press M button 2x or until you are in General Setting
- Use down/right arrow until you are on page 6 of 7 and see "Format Card"
- Press bottom right "OK" button and highlight "Yes". Press bottom right "Ok" button to confirm you want to format sd card.
- SD card is now formatted. If you format SD card in the future, it will erase everything that is currently on card.
- Press power button to get to recording mode
- Press Ok button to start recording
- We recommend formatting card once a month.

Setup instructions to keep dash camera from freezing:
- Press bottom left "OK" button, make sure camera is not recording.
- Once camera is not recording, press bottom left, MENU button until you are on Video Movie Mode Settings
- Use right/down button until you are on page 2 of 7 and highlight motion detection
- Press Ok and make sure it is OFF
- Press menu button to get into General Settings
- Use right/down button until you are on page 2 of 7 and highlight Parking Monitor
- Press Ok and make sure it is OFF
- Press power button to get to recording mode
- Press Ok button to start recording

Master Reset port is next to sd card slot
Using a safety pin, thumbtack, toothpick, etc. Press inside hole for a master reset of ORB WIFI dash camera.
