

What is ICONS?

ICONS is a data transmitting module used to monitor your compressed air equipment from anywhere in the world. Conveniently receive text & email alerts if your equipment needs attention. Check the status of each unit. See the running hours, loaded hours, temperature, pressure, service due, and much more.

Chicago Pneumatic

What are the benefits of **ICONS** on your compressed air system?

- Keep your compressor and dryer service up to date with real time service alerts and run time monitoring
- Prevent unexpected production interruptions and downtime with proactive service actions
- Your local Chicago Pneumatic service provider is linked to your equipment to provide quicker and more accurate response time.

- Choose from three levels of **ICONS** monitoring coverage to achieve energy efficiency goals
- Generate usage reports to show trending data on your compressed air system
- Automated reporting can be setup to send you targeted information of your choosing

- Quick reference overall system analysis
- Recommendations for improving efficiencies and compressor wellbeing
- Easily login to your **ICONS** portal to check your system in real time from anywhere in the world
