

# FAST ELECTRIC WATER HEATERS

10, 15, 25, 30 40, 50, 80, 100 **Liters** 

# CANON

Blue Diamond Inner Tank

**PUF** Insulation

Whirlflow Technology

**ABS Shell** 

**ELCB** 

High Magnesium Concentrated Anode Rod

# COMPETITORS

Galvanised Tank/ S.S Tank

Thermopole Insulation

Not Available

PP Shell

Simple Power Cord

Not Available

#### **Blue Diamond Inner Tank**

Ultimate protection against rust and corrosion. Blue diamond coating layer (0.3) mm provides corrosion resistance several times superior to standard inner tank designs.

#### **PUF Insulation**

It is high density polyurethane foam, with average thickness from 25mm to 50mm, it assures 360° thermal preservation and the minimum energy consumption.

#### **Whirlflow Technology**

Ensures no immediate contact between cold and hot water for a faster heating and maximum energy saving effect.

#### **ABS Shell**

Shock proof, elegant and durable.

#### **ELCB**

The earth leakage circuit breaker is designed to prevent shock and and injury to users. It quickly disconnects the circuit whenever it detects the imbalance of electric current.

#### **High Magnesium Concentrated Anode Rod**

The tank has an anode system with a stainless steel core that is designed to protect the tank from corrosive elements. The system uses a special cathodic action to fight the corrosive elements which in turn prolongs the life of the water heater.

#### **High Hydraulic Pressure Protection**

Self release inner tank pressure when it exceeds (0.8 mpa) and further prevents water back flow.

#### **Incoloy 840 Heating Element**

The element offers its excellent ability to resist both oxidization and carbonization in high temperature settings.

#### **Heavy Gauge Tank**

Made by ultra thick super hot-rolled steel plate with 1.8-2mm thickness.

#### **Adjustable Thermostat**

Modern sleek design allows a temperature setting between 25°C to 75°C.

#### **Overheat Protection**

Double Wire cutout disconnects both null & fire wire connections for a complete safety of product usage when temperature overshoots.

### **Four/Five Bolt Flange**

Provides an easier way for product maintenance.
