

CatPure™ Cy5 mCherry mRNA

Catalog No. CT119-cy5

Product Summary

CatPure™ Cy5 mCherry mRNA (N¹-Me-Pseudo UTP) emits bright, far-red fluorescence upon excitation at 651nm, and is also capable of expressing red fluorescent protein (mCherry) within cells, organoid, or *in vivo*. Cy5 fluorescence tracks the location of mRNA while fluorescence from mCherry protein demonstrates successful translation. It can be used for screening lipid nanoparticle formulations or other delivery systems.
