

The LED Waves I-ME Wall Remote Controller offers instant control of all luminaries, anywhere in your home or business.

Our I-ME series of LED lighting products incorporates the most advanced wireless communication technology, meets all bluetooth wireless communication protocol, and are easy to install, program and use.

- Built-in networking: The I-ME Wall Controller communicates with Smartphone and tablet devices and the I-ME Handheld Remote Controller (provided by LED Waves)
- Supports iOS and Android applications
- Allows for greater control of energy usage throughout the day
- Safe and dependable operation
- Improved EMI system stability

Wall Remote

For one touch digital control, link your I-ME Wall Controller with your supported device.

Download the iOS and Android "Bluelight 2" application on:

The bluetooth panel light is controlled via:

- A smart wireless dimming LED driver, powered with a bluetooth signal
- Can be easily linked to our I-ME Handheld Remote Controller (supplied)

Control energy usage, improve brightness or limit glare to create flattering illumination throughout the day.

Our I-ME Wall Controller offers easy programming to adjust Correlated Color Temperature (CCT) and dimming capabilities with one touch to the screen.

Operation instruction Define the key

| | |
|---|-------------------------|
|  | Warmer (CCT) |
|  | Dimmer (-) (CCT) |
|  | Colder |
|  | Increase brightness (+) |
| 1 2 3 4 | Group number |
|  | On/Off |
