

LED Star Cable Lighting System

An efficient future is at your fingertips. This LED cable lighting Kit brings new meaning to the phrase "low wattage." Consuming less than 40 Watt altogether (for a 5-light system), the LED Star Cable Lighting System is the latest and most exciting way to introduce the money-saving, stylish flair of LEDs into your life.

A LED Star Cable Lighting Kit includes:

- Star Cable fixtures of your choice (please specify the number of fixtures from the pull down menu)
- 8-Watt LED MR-16 Bulbs for each fixtures
- Your choice of LED power supply:

A dimmable LED Power Supply in Decorative Housing

or

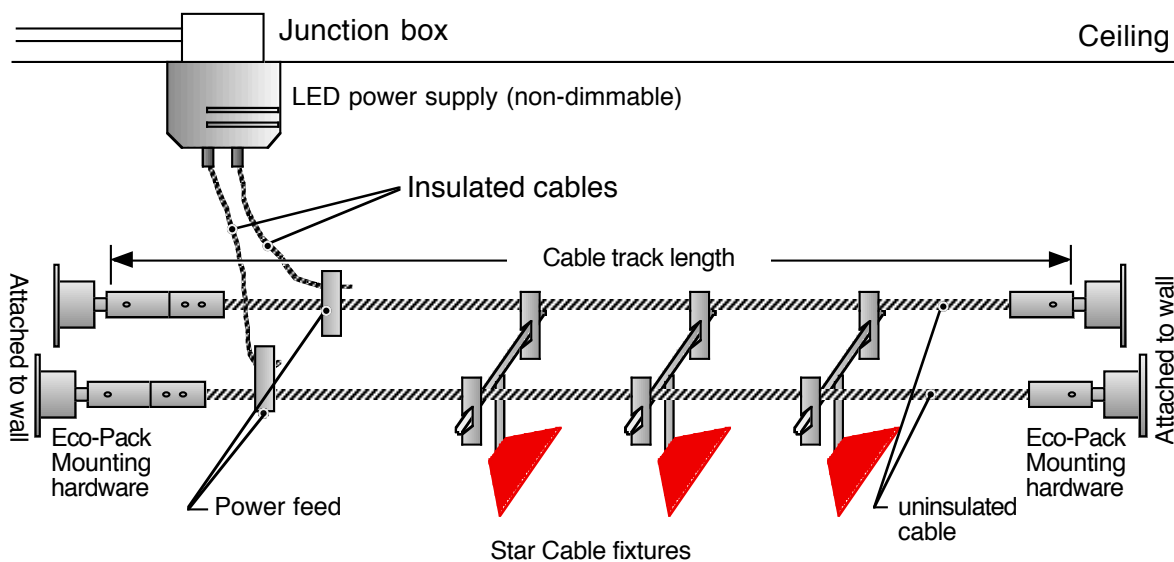

A Dimmable LED Remote Power Supply (60-150Watt)

A pair of power Feed (connectors between track and power supply).

- 40-foot uninsulated cable (it provides a 20-foot cable track)
- Wall-to-wall mounting hardware (2 pairs of Eco-Pack mounting hardware)

 Dimensions: 60 Watt version: H: 6.1", W: 2.6", D: 2.2" 100 Watt version: H: 7.6", W: 3.1", D: 3.0" 150 Watt version: H: 9.2", W: 3.1", D: 3.0"

Accessories for Star Cable Lighting System

Horizontal Support

It enables you to hang your system as far from the ceiling as you like! Perfect for lofts or large offices. Made of sturdy acrylic glass. Takes pressure off walls and sags out of wires.

Corner Turns (Set of 1 pair)

Designed for making a turn for cable runs. It can be used for mounting a cable lighting system on a ceiling. It comes with 1 pairs per kit. The height of the pole is 7.5".

Eagle Mounting Hardware (Set of 2 pairs)

Sleek, chrome-plated, cable mounting hardware. The adjustable beak provides the means to tighten the cable after installation.

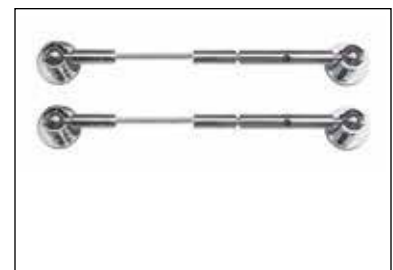

Deluxe Mounting Hardware for Cable Lighting System

Comes with 2 pieces. It can double as a live feed.

Uninsulated Cable (10AWG)

Uninsulated Cable: bare wire, no outer cover

Eco-Pack Cable Mounting Hardware

Mounting hardware for cable lighting system.
