Please follow the instructions provided herein. Installing or operating this product in a manner inconsistent with these instructions will void its warranty and may result in loss of life or property. Keep this manual for future reference.

Note that this product has no user serviceable parts. For troubleshooting assistance, contact manufacturer LED Waves. Please save this installation guide and all related literature for future reference.

MECHANICAL INSTALLATION INSTRUCTIONS

1. Adjust the angle on your Owl Pack unit.
   (For the 10W, 30W, 50W, and 70W version units, see Figure 1)
   (For the 100W and 200W version units, see Figure 2)

   **Figure 1**
   A. Loosen the bolt on the mounting bracket with an allen wrench.
   B. Adjust the mounting bracket to your desired angle.
   C. Tighten the bolt to secure the mounting angle of your unit with an allen wrench.

   **Figure 2**
   A. Remove the bolt on the mounting bracket.
   B. Adjust the mounting bracket to your desired angle.
   C. Tighten the bolt to secure the mounting angle of your unit.

2. Secure the unit.
   (For secure mounting, please use the appropriate screw sizes as indicated on the unit.)

ELECTRICAL WIRING INSTALLATION INSTRUCTIONS

3. ![Disconnect your electricity.](image)

4. Connect the black wire on the unit to the black wire of your junction box with a wire nut. (Junction box and wire nuts provided by others)
5. Connect the white wire on the unit to the white wire of your junction box.
6. Connect the green wire on the unit to the green wire of your junction box.
7. Re-connect your electricity.
8. Turn on the unit.
