# ABOUT US

At Globaltex Fine Linens, we offer the best quality in 100% USA and Turkish Cotton. Our cotton is imported from our factory located in Denizli, Turkey, the textile mainland of the country, and the world. Turkish cotton is notable for being soft and gentle like Egyptian cotton but is even more absorbent and even gets softer with consecutive washes. This is because the water from the wash soaks into the fibers, causing them to thicken and gain more softness.

The organic cotton we use is also notable for being softer than regular cotton as the material isn't treated with harsh chemicals that can strip it of some of its fibers. It's also more environmentally friendly, again because it doesn't utilize any harsh chemicals that would then run off into the local water supplies. A major part of our goal is to help make luxury accessible. We believe everyone deserves the luxury of 100% organic Turkish cotton.
