

A AQUA MUNIT[®]

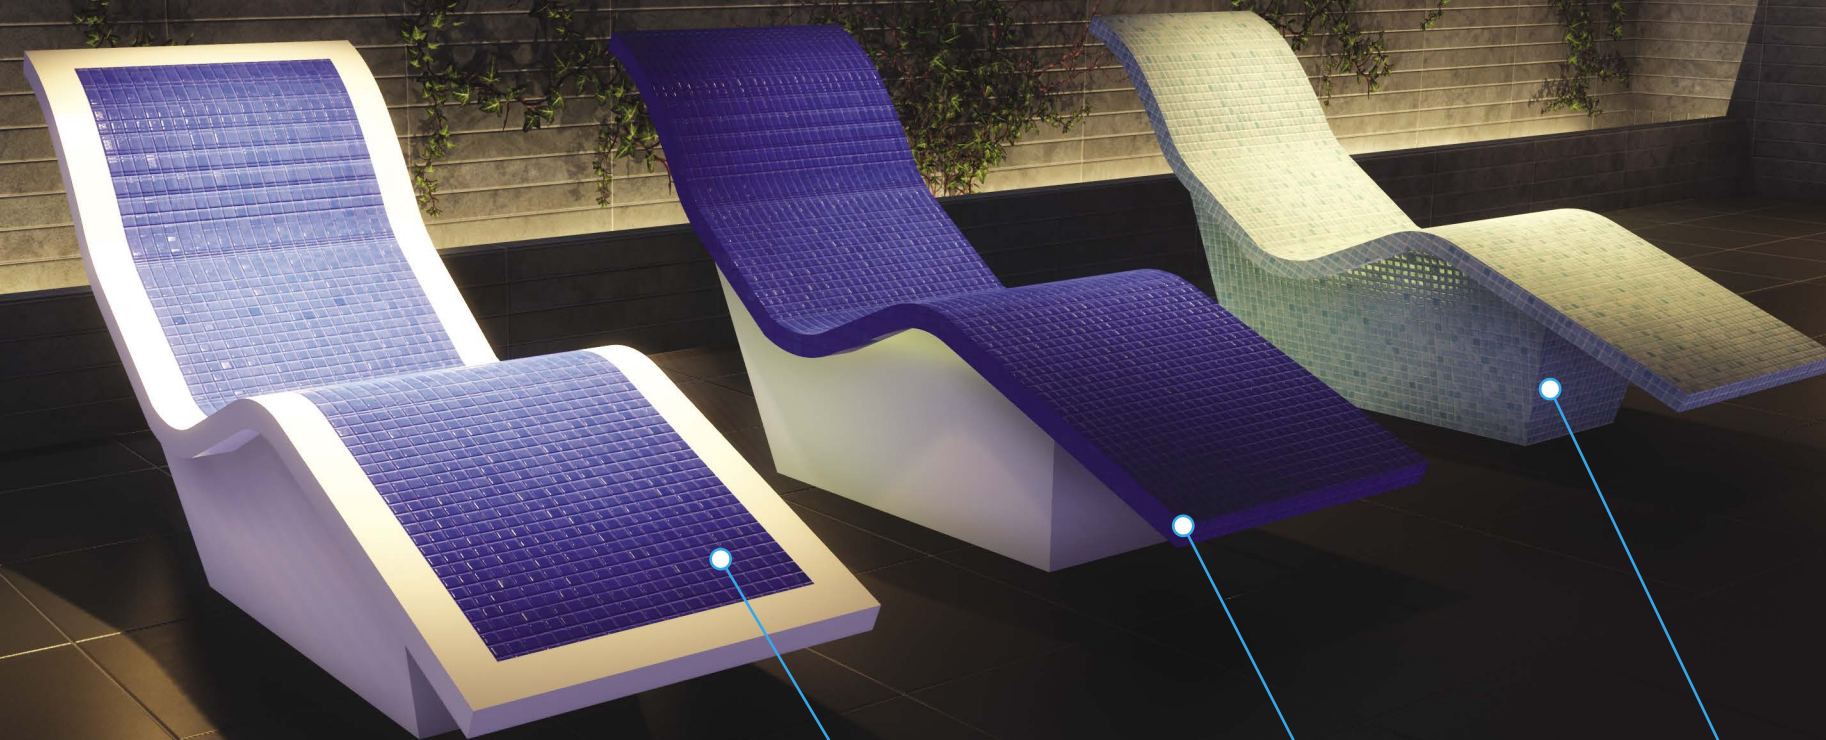

HEATED LOUNGERS

Heated Lounger

Bradford Heated Loungers are the ultimate place to relax. Often positioned in sets near a vitality pool or hot tub, these custom loungers provide a low maintenance, hygienic addition to a day spa or residential space.

Gentle heat radiates from the tiled surface providing a warm and soothing effect. The ergonomic design further enhances the lounging experience.

Many resort spas use Bradford heated loungers as a place for guests to unwind between treatments.

Tile Inlay

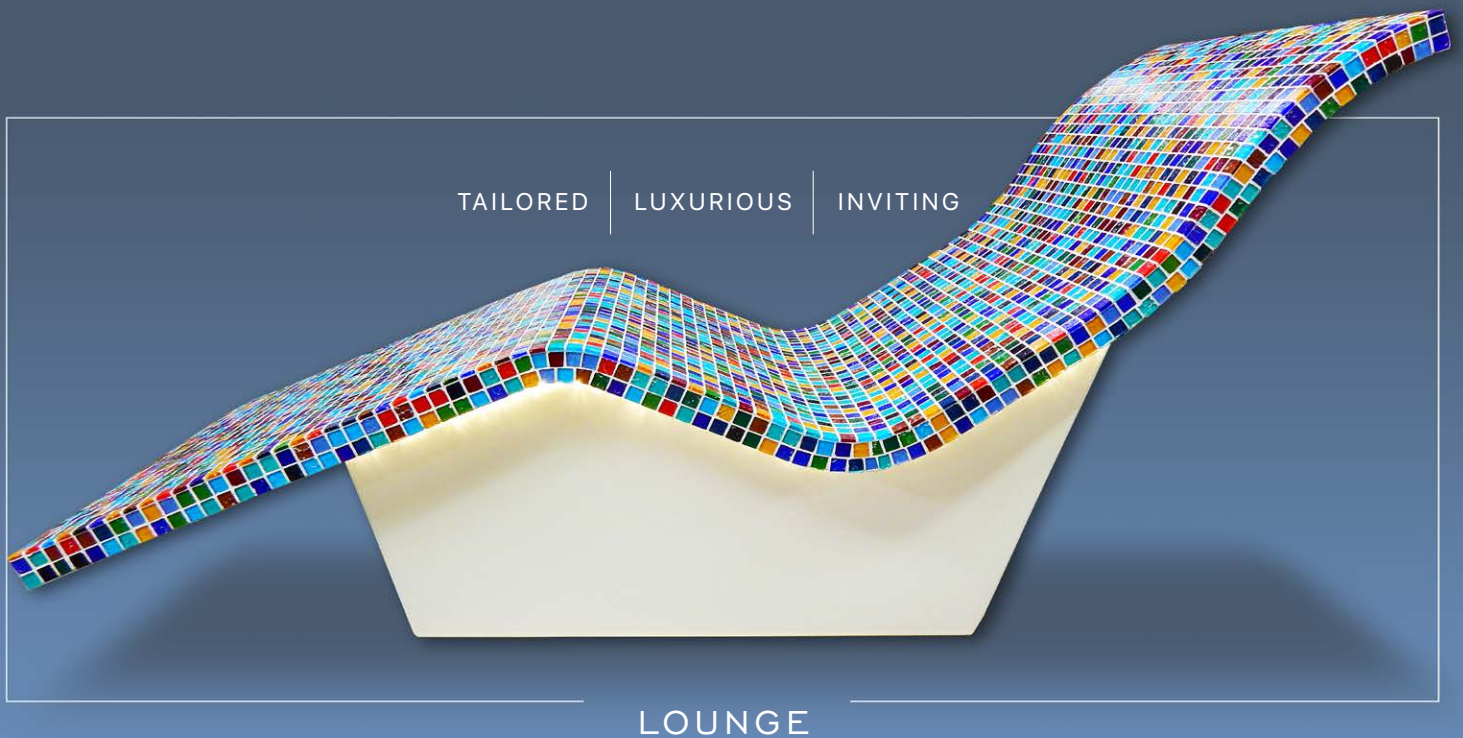

Inlaid tile sits flush with the lounge surface, leaving the border and base untiled.

Tile Top

Tile covers the lounge surface, border and edges, leaving the base untiled.

Full Tile

The entire lounger is finished with selected choice of tile.

RELAXATION YOUR WAY

Bradford Heated Loungers are suited for indoor and protected outdoor locations, offered in both Residential and Commercial models.

Electrical radiant heating wires are formed into the shell structure beneath the tiled surface, and completely sealed from the elements. The lounge temperature is controlled by a digital thermostat which maintains heat around 10°C above the ambient temperature.

The lounge's durable fiberglass body is marine grade, colorfast, and resistant to fading. The custom tiled surface is hard wearing while providing a permanent and luxurious finish.

Available Options: 54 base color variants | Wide array of tile choices
LED accent lighting | Remote thermostat location
