

Use & Care Manual

(Please keep the manual for future reference)

PACKAGE CONTENTS

Typical Parts List:

Typical Assembly Required:

Part	Description	Quantity
A	Solar Lights	2 / 4
B	Connection Poles	2 / 4
C	Ground Stakes (located in the Pole B)	2 / 4
D	14430 3.2V 450mAh LiFePO4 Rechargeable Battery (preinstalled)	2 / 4

The lifetime for LEDs is estimated to be 100,000 hours.
No need to replace under normal use.

**⚠ Please carefully read all the instructions before assembly.
Failure to do so may result in faulty assembly and potential injury.**

PRODUCT SPECIFICATION

Product Size: 5.75**5.75**24.6"H (14.7*14.7*62.5CM) (including ground insertion) ;

Solar Panel: 1PC 4V/85mAh 64*64 MM Polycrystalline Solar Panels

Battery: 1PC 14430 3.2V 450mAh LiFePO4 Rechargeable Battery ;

LED: Integrated LED with Vintage Bulb;

Lumens: 20LM;

Color Temperature: Warm White (2700K);

Material: Metal Cover + Bubble Glass Lens + Plastic Frame + Metal Pole + Aluminum Ground Stake;

Fixture Color/Finish: Two-Tone Bronze and Wood Tone

FIRST TIME USE

Step 1: Detach the light cover from the top of the lens section by twisting it. In an anti-clockwise direction and gently lifting off.

Step 2: Pull out the insulating strip which is on the bottom of the Solar Panel Unit.

Step 3: Re-assemble the light head by aligning the locking tabs on the side.

Step 4: Solar light needs to charge in full sunlight for 8 hours allow the rechargeable batteries to reach maximum capacity.

Note: There may be a protective film on the solar panel, which must be removed before use.

ASSEMBLY

Carefully remove the solar lights with all accessories from the box.

Note: For packaging reasons, accessories may be stored in the box under a cardboard cover or in styrofoam.

1. Unscrew the solar lid of the solar light, and pull out the safety strip.
2. Turn the lid back onto the glass of the solar light so that both parts are tightly closed.
3. Connect the solar light to the mounting rod.
4. Connect the other side of the mounting rod to the ground spike.

CAUTION: In compacted, clay, or hard soils, moisten the ground with water before inserting the stake into the ground to avoid breakage.

LOCATION

- It is important to charge the light in direct sunlight for more than 8 hours each day.
- The lighting hours of the solar light depends on the geographical location and weather condition. Stronger or longer exposure to sunlight enables the battery to store more energy and provide longer lighting hours.
- Make sure not to place the solar lights in the shadow of trees, buildings, or other external light sources, such as street lights or porch lights which may cause the solar lights to turn off automatically.
- The solar lights are specially designed for outdoor use and are ideal for night lighting in gardens, paths, etc. The shady place will not be able to fully charge the battery, which will reduce the lighting time of the lights at night and affect the brightness.

CLEANING AND MAINTENANCE

- Please clean the solar panel with a damp cloth.
- Do not use any chemical or abrasive cleaners. Prevent moisture from entering the solar panel unit.
- Replacement parts may be ordered by using the fixture model number and part's name.

⚠ Please keep the product as far away from flammable materials.

RECHARGEABLE BATTERY

This product contains (1) 3.2V 450mAh LiFePO4 Rechargeable Battery. When the battery expires, it must be recycled or disposed of properly. Please contact your local waste disposal authority for the correct procedure. Do not put the battery into fire.

FUNCTION

The built-in solar panels convert sunlight into electricity. The rechargeable battery stores the energy and converts power into light for use during the night.

WARNING

- Do not dispose of Lithium batteries in municipal waste stream or by fire as batteries may explode.
- Do not open, short circuit, or mutilate batteries. Dispose of batteries in accordance with Local, State, and Federal regulations. Contains no toxic metals.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (Carbon-Zinc), or rechargeable (Nickel Cadmium or Nickel Metal Hydride) batteries.

REPLACING THE BATTERY

If there is a lot of direct sunlight and the lighting time is still short, the battery may need to be replaced.

Step 1: Carefully unscrew the lid of the solar light.

Step 2: Open the battery cover at the bottom of the solar lid.

Step 3: Remove the battery and replace it with an equivalent new rechargeable battery with the following specifications: 14430 3.2V 450mAh LiFePO4 Rechargeable Battery.

Step 4: Be sure to insert the battery in the correct direction (polarity+/-).

Step 5: Reassemble the unit by following the steps above in reverse order.

TROUBLESHOOTING

The light does not come on at night:

- ✓ Make sure the safety strip was pulled out.
- ✓ Check the rechargeable battery and make sure that it is in contact with the metal plate and the polarity is correct. If the battery is worn out, replace the battery with the 14430 3.2V 450mAh LiFePO4 Rechargeable Battery
- ✓ Always keep the solar light distant from other night light sources, such as exterior lights. Reposition the light to avoid close contact with other night light sources.
- ✓ Make sure the solar panel is clean and free of dirt and debris. If needed use a damp cloth to clean the solar panel. Do not use any chemical or abrasive cleaners.
- ✓ Prevent moisture from entering the solar panel unit.

At XMcosy+, we provide a complete line of lighting products, which suitable for porches, terraces, and landscaped areas to make your home safe and attractive.

XMcosy+ always believes that good design could make life easier and delighter. Just like what we did, our XMcosy+ Outdoor Lighting was born for cozy, smart, and stylish life!
