3T The River Hybrid > Halogen Free < Made in E.U.

Our entry-level interconnect model with both centre core and shielding is made of 3T conductors. The centre conductor is made of 19 strands of 150-micron Ø each. In combination with the extra Linear Structured Carbon[®] (LSC) layer around the centre core, we have applied two very innovative technologies together to open doors to the highest quality in musical experiences.

The shielding is made of 40 3T strands combined with 2 layers of multiple heavy silver-coated high-quality copper strands. Our exclusive 3T technology gives a much higher resolution and richer detail, compared to any other metal technology used so far.

Mounted with rhodium-plated Cinch - 7.3 (RCA) connectors, and also available as digital interconnect.

0.8m RCA – RCA pair <i>Item code: B70BA008</i>	EUR	329,00
1.0m RCA – RCA pair <i>Item code: B70BA010</i>	EUR	359,00

3T The Sea Hybrid > Halogen Free < Made in E.U.

Our second 3T coaxial interconnect with technical upgrades compared to the 3T River Hybrid. The single Hybrid centre conductor is made of a thicker 3T single-strand conductor with 400-micron Ø and coated with a Linear Structured Carbon[®] (LSC) layer to improve the signal quality. The shielding has 3T strands and 2 layers of multiple heavy silver-coated high-quality copper strands.

The dynamic sound character combined with the very high resolution will be a very big surprise to you. All our combined and innovative 3T technology contributes to a very natural sound reproduction never experienced before.

Mounted with rhodium-plated C - 8.0 (RCA) connectors.

0.8m RCA – RCA pair <i>Item code: B71BA008</i>	EUR	379,00

The Integration Hybrid > Halogen Free < Made in E.U.

Based on our Fusion Technology, highly resistant to interference noise: star quad configuration with four-stranded FUSION conductors with very effective triple-layered shielding. Low capacitance presents a low load to the signal source. This means that long runs of cable can be used without losses. With a durable gold-tone HULLIFLEX® jacket.

Mounted with gold-plated Cinch - 8.0 (RCA) or silver-plated Neutrik XLR balanced connectors.

Available on wooden 100-meter reels, price per meter	EUR	67,50

The Orchid > Halogen Free < Made in E.U.

New ideas about the transmission of ultra-low-level signals with a very high resolution were the design parameters of our Ø 2.9 mm thin triaxial interconnect. With Linear Structured Carbon® (LSC) doped insulators it embraces a dense braided 80-strand shield, a similar underlying 48-strand second shield and a core of Oxygen Free Copper (OFC) with a dense silver coating. The Orchid is ideal as interconnect, internal wiring for equipment or as a studio musical instruments cable.

Mounted with 4 gold-plated C - 3.0 (RCA) connectors or Neutrik silver-plated XLR connectors.

3T The Mountain Hybrid > Halogen Free < Made in E.U.

Our superlative representative of the 3T interconnects. 3T The Mountain Hybrid once connected you'll never want to change to any other cable.

3T The Mountain Hybrid is our 3T top-end model with a balanced construction and developed with 2 conductors each made of a 900 micron 3T conductor and individually coated with a layer of Linear Structured Carbon® (LSC). The shielding (screening) consists of four even layers: two made of heavy silver-coated high-quality copper multi-strand conductors and the other two are made of Linear Structured Carbon® (LSC). After a run-in (brake-in, burn-in) time of three to five hours, you'll be travelling through the dramatic improvement of the sound transmission.

Mounted with rhodium-plated Cinch – 11.4 (RCA) connectors or black Neutrik silver-plated XLR connectors.

The CNT > Halogen Free < Made in E.U.

Our latest contribution to the always interesting world of recording and replay is our Carbon Nano Tube based interconnect: The CNT.

Carbon Nano Tube is the most advanced conductor material at the moment available and exclusively used in our The CNT. **We are proud to announce that we are the first company worldwide to have a high-tech & commercial application of this very advanced type of carbon.** The sound quality is unsurpassed with all the properties an audiophile could dream about: a very spacious, immensely dynamic and transparent sound without any harshness. Listening gives you the feeling you are in front of the real soundstage.

Mounted with rhodium-plated RCA or silver-plated Neutrik XLR connectors, and packed in an aluminium case.

The Platinum Hybrid Mk II Balanced > Halogen Free < Made in E.U.

Very limited-edition high-quality balanced interconnect with extremely purified **platinum(!)**

A signal conductor with a platinum-coloured HULLIFLEX® High-Density jacket. With our vast knowledge of metal technology, we started by calculating the ideal specifications of the conductor and matched the type of metal that possessed these numbers. It turned out that two 0.3 mm Ø solid core pure platinum conductors were right on the dot. The impedance between two natural conductors is a very precise 110Ω. The result is thus not only a very attractive-looking cable but also probably **the best metal based balanced interconnect on the market today**. After our very successful introduction of the Platinum Hybrid MK I, we have been looking at any possible improvement, which we realised in a lower capacitance conductor with an improved thicker jacket.

Mounted with rhodium-plated Cinch - 11.3 (RCA) or silver-plated Neutrik XLR balanced connectors. Packed in a beautiful aluminium case.

3T The River Hybrid > Halogen Free < Made in E.U.

Our coaxial entry-level interconnect model with both centre core and shielding is made of 3T conductors. The centre conductor is made of 19 strands of 150-micron Ø each. In combination with the extra Linear Structured Carbon® (LSC) layer around the centre core, we have applied two very innovative technologies together to open doors to the highest quality in musical experiences.

The shielding is made of 40 3T strands combined with 2 layers of multiple heavy silver-coated high-quality copper strands. Our exclusive 3T technology gives a much higher resolution and richer detail, compared to any other metal technology used so far.

Mounted with rhodium-plated Cinch - 7.3 (RCA) connectors.

1.4 The Crimson series

Just when you think "It doesn't get any better..." we will get into our high-end section cartridges:
The Crimson

As the popularity of vinyl is reviving again, many requests came in to develop a high-end phono cartridge placed between The Frog and The Colibri. The Crimson is completely hand built by A.J. and William van den Hul and comes with a free-of-charge 250-300 hour service check-up.

The Crimson is available in a variety of models, which includes differences and upgrades in:

- Body material and lacquer
- Coil wiring and tension wire
- Suspension
- Magnetic field
- Cantilever length

These differences and upgrades will help The Crimson to achieve superb tracking ability and extended channel separation.

1.5 The Colibri series

As a result of phono cartridge builder A.J. van den Hul's continuous research into improving the quality of his phono cartridge designs, we are proud to present our top model phono cartridge: **The Colibri**

The Colibri is the culmination of **50 years** of phono cartridge research and development, and with this top model, we return to the plain essence of phono transduction. The Colibri is completely hand built by A.J. and William van den Hul and comes with a free-of-charge 250-300 hour service check-up.

The Colibri is available in a variety of models, which includes differences and upgrades in:

- Body material and lacquer
- Coil wiring and tension wire
- Suspension
- Magnetic field
- Cantilever length

These differences and upgrades will help The Colibri to achieve superb tracking ability, extend channel separation, and an unbelievably straightforward clean, and open soundstage.
