

## Wristband POOL

### Description

The POOL wristband is an RFID data carrier for contactless processing and storage of data with a read/write range of up to 50 mm. The wristband is highly flexible and ensuring a comfortable fit. It is also anti-allergenic. The housing is made of high-quality, robust plastic and impresses high shock and break resistance. The POOL wristband can be used in hot and humid environments without any issues.

- LF

## Technical data

Product specification	
Dimensions	250 mm (L) , 16 mm (W)
Housing cover	Ø 28 mm
Material	Case: ABS Bracelet: TPU Clasp: Steel
Protection class	IP68

Available 125 kHz ICs	
IC Model	Memory Size
EM 4200	8 Bytes
NXP Hitag 1	256 Bytes
NXP Hitag S2048	256 Bytes

Available 13.56 MHz ICs	
IC Model	Memory
NXP MIFARE® Classic 1K EV1	1024 Bytes
IDT M1K (Fudan)	1024 Bytes
LEGIC PRIME MIM256	256 Bytes

Other chip types on request!
