PLEASE READ AND FOLLOW ALL ASSEMBLY INSTRUCTIONS, SAFETY INFORMATION, AND OPERATING INSTRUCTIONS OF YOUR OWNER’S MANUAL BEFORE INITIAL START UP.
**ASSEMBLY**

**UNBOXING & LEG INSTALLATION**

**IMPORTANT!** The grill is very heavy. Always use 2 people when lifting the grill.

1. **UNBOXING**
   - Open and remove front shelf.

2. **UNBOXING**
   - Open STATER BOX. Reference parts list. Remove cardboard filling.

3. **UNBOXING**
   - Cut down box corners to access grill. Remove internal parts & legs.

4. **LAY BACK FOR LEG ACCESS**
   - Lay grill down on its back. Keep on cardboard to prevent scratches.

5. **INSTALL LEGS**
   - Use extra cardboard to prop up grill base for easier leg installation.

6. **INSTALL LEGS**
   - Install legs correctly as shown here.

### BOTTOM SHELF

**IMPORTANT!** The grill is very heavy. Always use 2 people when lifting the grill.

1. **STAND GRILL UPRIGHT**
   - Carefully lift grill up and stand upright.

2. **INSTALL BOTTOM SHELF**
   - Slide shelf down to sit on shelf arm bolts. Align with grooves under shelf.

### LID HANDLE

**IMPORTANT!** Keep 2 spacers on each side of the grill lid to minimize heat transfer to the handle.

3. **REMOVE HANDLE**
   - Unscrew handle from inside grill lid.

4. **INSTALL HANDLE**
   - Flip hand around to the front and fasten to lid as shown here.

### FRONT & SIDE SHELVING

**NOTE:** Front shelf mount brackets attach in the same holes used for the front legs.

5. **MOUNT BRACKETS**
   - Install brackets in leg holes.

6. **FRONT SHELF**
   - Attach front shelf hinges to brackets.

7. **SIDE SHELF**
   - Line up the bullets with the pins on side wall and clip shelf into support bar.

### CHIMNEY

**IMPORTANT!** Make sure the chimney cap ALWAYS stays open.

8. **REMOVE BOLTS**

9. **INSTALL CHIMNEY**
   - Insert adjuster handle into hole on right side of grill wall and screw into head shield.

### HEAT SHIELD

**IMPORTANT!** For proper heat shield positioning, use the marks on the adjuster handle. The grill wall should align with the -.5 mark on the handle, setting the heat shield 4.25 in. from the left inside grill wall.

10. **HEAT SHIELD POSITIONING**
    - Recommended position for even heat distribution: approx. 4.25 in. from left wall.

### GREASE TRAY, GRATES, & GREASE BUCKET

**IMPORTANT!** Make sure to insert grease tray as shown below for proper temperature reading and grease drainage.

11. **GREASE TRAY**
    - Follow grease tray cut-outs as shown.

12. **GRILL GRATES**
    - Insert grates as shown.

13. **GREASE BUCKET**
    - Hang bucket on drip spout.
