

TOGAMA
MORE THAN MOSAIC

#Pool

Más que mosaico

En TOGAMA combinamos Arte y Tecnología.

Más que una fábrica de mosaico, somos una empresa que continuamente toma el pulso a la vanguardia para ofrecer un producto que está por encima de las expectativas técnicas y de estilo que nos exigen los profesionales.

Por ello, más que un producto, ofrecemos un modo de entender el espacio urbano y doméstico dentro del marco de la alta decoración, apostamos por un estilo de vida personalizado donde la preocupación por el detalle y la sensibilidad ante las nuevas tendencias son nuestra filosofía de producto.

En TOGAMA entendemos que el diseño es un valor añadido que nos diferencia del resto, que es una impronta que queda latente en cada uno de los proyectos que desarrollamos, y que es el ingrediente necesario para que generemos espacios con vida propia.

More than mosaic

Togama combines art and technology.

Rather than a factory producing glass mosaic, we are a company that continually takes the pulse of the avant-garde, offering a product that is above expectations and stylistic techniques required by professionals.

Therefore, rather than a product, we offer a way of understanding urban and domestic space within the framework of high decoration, opting for a personalized lifestyle, where concern for detail and an awareness of new trends is our philosophy.

At Togama, we understand that design is an added value that allows us to make a difference, a mark that remains latent in each of the projects we develop, and that is the necessary ingredient for us to generate living spaces .

Mehr als Mosaik

Togama verbindet Kunst und Technologie.

Mehr als ein Glasmosaik - Werk, sind wir ein Unternehmen, das immer am Puls der Avantgarde ist, mit einem Produkt, das stets über den Erwartungen und stilistischen Techniken liegt, die die Fachleute heutzutage fordern.

Daher, eher als ein Produkt, bieten wir eine Möglichkeit des Verständnisses von urbanem und häuslichem Raum im Rahmen der Spitzendekoration. Mit einem persönlichen Lebensstil, in dem die Liebe zum Detail und ein Bewusstsein für neue Trends vorrangig ist.

Wir bei Togama glauben, dass Design ein Mehrwert ist, der uns von der Masse unterscheidet, ein Merkmal, das latent in jedem der Projekte, die wir entwickeln ist und bleibt, und nötig ist, um Räume voller Leben zu schaffen.

Plus que des émaux

À Togama, nous combinons l'Art et la Technologie.

Plus qu'un firm fabricant d'émaux de verre, nous sommes une entreprise constamment à l'avant-garde afin d'offrir un produit qui se place au-delà des attentes techniques et de style que les professionnels nous exigent.

C'est justement pour ça, que plus qu'un produit, nous offrons une nouvelle façon de comprendre l'espace urbain et domestique dans le cadre de la haute décoration, nous partons de la base d'un style de vie personnalisé dont le valeur aux détails et la sensibilité face les nouvelles tendances sont notre philosophie de produit.

À Togama, nous pensons que le design est une valeur ajoutée qui nous distingue du reste, un sceau d'identité qui reste latent à chacun des projets que nous développons et qui constitue l'ingrédient nécessaire pour nous permettre de créer des espaces pleins de vie.

TOGAMA tiene como objetivo ser un líder en la industria en Salud, Seguridad y Medio Ambiente. Compartimos nuestras mejores prácticas con otras empresas, cuidándonos mutuamente y también del medio ambiente. Nuestro propósito es cero accidentes y nuestro enfoque es la mejora continua. En 2009 empezamos con el método LEAN y esta metodología consiste en mejorar todos los procesos en la creación, puesta en marcha y desarrollo de la empresa.

TOGAMA aims to be a leader in the Health, Safety and Environment industry. We share our best practices with other companies, taking care of each other and also the environment. Our purpose is zero accidents and our focus is continuous improvement. In 2009 we started with the LEAN method and this methodology consists in improving all the processes in the creation, start-up and development of the company.

TOGAMA vise à être un leader dans l'industrie de la santé, de la sécurité et de l'environnement. Nous partageons nos meilleures pratiques avec d'autres entreprises, en prenant soin les uns des autres et aussi de l'environnement. Notre objectif est zéro accident et notre objectif est l'amélioration continue. En 2009, nous avons commencé avec la méthode LEAN et cette méthodologie consiste à améliorer tous les processus de création, de démarrage et de développement de l'entreprise.

Limpeza final de obra.

Después de la colocación es fundamental realizar una buena limpieza con el fin de eliminar residuos de junta y en general suciedad de la obra. Para esta operación recomendamos el empleo de un detergente de acción ligeramente ácida que no despida humos tóxicos y respete las juntas, el material y el usuario, como FILA-DETERDEK.

En el caso de material colocado con junta epoxi o en base resina, se aconseja realizar la limpieza final de obra con un limpiador específico de residuos epoxi, como FILACR10.

Mantenimiento.

Para un buen mantenimiento del mosaico se aconseja el empleo de un detergente neutro con alto poder limpiador como FILACLEANER.

Recomendamos el uso de FILASTONE PLUS para las series SILK y 5ILK, proporciona un efecto revitalizante en la tonalidad, al tiempo que protege contra los agentes atmosféricos y contra todo tipo de manchas orgánicas.

Final cleaning of work.

After installation it is essential to perform a good cleaning in order to remove joint residue and in general dirt from the work. For this operation we recommend the use of a mildly acidic detergent that does not emit toxic fumes and respects the joints, the material and the user, such as FILADETERDEK.

In the case of material placed with epoxy gasket or resin base, it is advisable to perform the final cleaning of the work with a specific epoxy waste cleaner, such as FILACR10.

Maintenance.

For a good maintenance of the mosaic we recommend the use of a neutral detergent with high cleaning power such as FILACLEANER.

We recommend the use of FILASTONE PLUS for the SILK and 5ILK series, it provides a revitalizing effect on the tone, while protecting against atmospheric agents and against all types of organic stains.

Nettoyage final des travaux.

Après la mise en place, il est essentiel de procéder à un bon nettoyage afin d'éliminer les déchets de joints et, en général, la saleté des travaux. Pour cette opération, nous recommandons l'utilisation d'un détergent légèrement acide qui ne dégage pas de vapeurs toxiques et qui respecte les joints, le matériel et l'utilisateur, tel que FILADETERDEK.

Dans le cas de matériaux posés avec un joint en époxy ou une base en résine, il est conseillé d'effectuer le nettoyage final du travail avec un nettoyeur pour déchets époxy spécifique, tel que FILACR10.

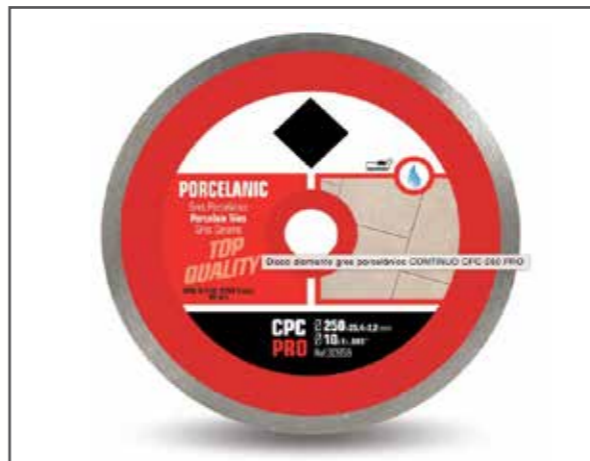

La maintenance.

Pour un bon entretien de la mosaïque, nous recommandons l'utilisation d'un détergent neutre à haut pouvoir nettoyant tel que FILACLEANER.

Nous recommandons l'utilisation de FILASTONE PLUS pour les séries SILK et 5ILK, il procure un effet revitalisant sur le ton, tout en protégeant contre les agents atmosphériques et contre tous les types de taches organiques.

Sierra portátil para discos de corte.
Portable saw for cutting discs.
Scie portable pour disques.

Disco de diamante para corte de Gres Porcelánico.
Diamond disc for cutting of Porcelain Stoneware.
Disque diamant pour la coupe de grès cérame.

Al colocar el mosaico, es necesario cortarlo para adaptarlo a la geometría del lugar a decorar. En TOGAMA recomendamos **sierra eléctrica portátil para discos de corte** antes que las tenazas puesto que el corte resultante es un corte de mayor calidad y sin filo.
El disco de diamante debe ser del tipo continuo húmedo.

When installing the mosaic, it is necessary to cut it to adapt it to the geometry of the space to decorate. In TOGAMA we recommend portable electric saw for cutting discs instead of the pliers since the resulting cut is a higher quality cutting and without cutting edge.
The diamond disc must be of the continuous wet type.

Lors de la pose de la mosaïque, il est nécessaire de la découper pour l'adapter à la géométrie de l'endroit à décorer. Chez TOGAMA, nous recommandons l'utilisation d'une scie électrique portable pour les disques de coupe avant les pinces car la coupe obtenue est de meilleure qualité et ne présente pas d'arête de coupe.
Le disque de diamant doit être du type humide continu.
