

Autodesk Desktop Subscription

The new way to buy for ultimate flexibility

Desktop Subscription gives you access to Autodesk software—the same full version you get with a perpetual license—but with a flexible, pay-as-you-go approach for a software budget that's easier to manage.

Stay competitive with Desktop Subscription

When you decide to purchase an Autodesk Desktop Subscription, you're maximizing the power of your design tools while gaining control over your costs and the length of your commitment. Your software tools will always be up to date with the latest releases and enhancements, while your workflow will benefit from increased capabilities—from flexible licensing to more capabilities with Autodesk® cloud services.

Pay-as-you-go access

Whether your projects are temporary or ongoing, you can keep software costs manageable and predictable. Pay only for the access you need, without an up-front investment or long-term commitment.

Scalable licensing

Companies grow. Projects expand. Employees don't stay in one place. Be prepared for whatever changes come your way with licensing that scales to meet your organization's needs.

Up-to-date software

With Desktop Subscription you always have the latest and most powerful tools on hand. You can gain immediate access to software releases and product enhancements that can help you maintain a competitive edge all year long. Desktop Subscription keeps your software current while its short-term commitments help you maintain a predictable software budget.

Access to Autodesk cloud services and products

With an Autodesk Subscription to a commercial product or suite you gain access to a collection of cloud services. The virtually infinite computing capacity of the cloud allows you to run tasks without tying up your desktop or the need for expensive hardware. Now you can test the performance of multiple design options and rapidly increase the number of visualizations as an integrated part of your workflow.

You can access Autodesk cloud services through a web interface or through your desktop software. The following are but a few of the cloud services available:

- Green Building Studio®
- Rendering in Autodesk 360
- Energy Analysis for Revit®
- Mockup 360

Flexible licensing rights

The freedom to work the way you want.

When collaborating across internal and external teams, you need the right software on hand at the right time and place. With the following flexible licensing rights,* Desktop Subscription gives you more freedom with your software:

Previous version rights: Customers sometimes require you to deliver projects with a specific software version. With previous version rights, you're able to use both previous and current versions of Autodesk software to deliver your projects.

Home use rights: Work doesn't always happen in the office—with Desktop Subscription you're able to use your software at the office or at home.

Extra territory rights: Occasionally work requires you to travel far away from home—extra territory rights allow you to use your licensed software outside the country of purchase.

With Desktop Subscription you can...

Desktop Subscription provides you with the ability to easily respond to changing business needs. Whether you have budget constraints, increased workflow, or changes to your headcount, a flexible Desktop Subscription allows you to address these changes head-on.
