

Impact Report

Quarrelsome Coffee 8 oz,
12 oz & 5 lb

Your savings

Quarrelsome Coffee 8 oz, 12 oz & 5 lb is cleaning our environment, saving our oceans and reducing carbon emissions

Grounded has designed a unique system to create transparency across packaging material and sustainability data. Through the *this bag saves* impact framework customers are able to target three critical environmental issues: circularity, atmospheric carbon, and ocean health.

**the below numbers are an estimate of first order, actuals to be provided on finalisation of order*

this bag saves

29,376 units =

825kg

Ocean bound plastic saved

1,766

Bottles saved from the ocean

Impact Calculator

Our sophisticated environmental impact calculator takes over 60,000 data points from our supply chain to measure the impact you're making by moving towards a more sustainable packaging solution.

Savings from changing materials

Virgin plastic:
825 kg petrochemical materials

Post-consumer recycled laminate:
660 kg renewable materials

Reduction in reliance on virgin fossil fuel materials:
80%

Footprint from production & logistics

Raw Materials Footprint:
474 kgCO₂

Production Footprint:
671 kgCO₂

Logistics Footprint:
715 kgCO₂

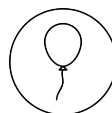

Carbon Offsetting

To offset the impact of carbon emissions created during production and logistics, we buy carbon credits. The price of credits vary depending on the project, so we work hard to handpick the most efficient and effective projects that reduce CO₂ pollution. All of the carbon credits we buy are verified by either Gold Standard or Verified Carbon Standard.

1,860 kgCO₂

The total carbon footprint offset for this order

36,289

Number of party balloons that hold the equivalent amount of CO₂

6
